Product name: ENDORFY Streaming Boom Arm
Product code: EY0A006

Long meetings with the boss, even longer streams, and don't forget to record that podcast... The ENDORFY Streaming Boom Arm will handle almost any (work)load without breaking a sweat. It's a durable microphone arm that keeps your mic steady, simple as that.

The ENDORFY Streaming Boom Arm is also very easy to assemble. Just clamp it onto the tabletop, plug in the mic and you're ready to go. Thanks to the built-in grommet, no unruly cable will interfere with your plans.

Mic (and desk) check
The best part of the Streaming Boom Arm is that it keeps your desk in check. Thanks to its help, you'll finally get rid of that long cable dangling from the microphone. And with the space all tidied up, who knows — maybe you'll even make it onto the cover of an interior design magazine ;)

All thanks to the minimalist design and the durable metal frame. It's unobtrusive and efficiently hides the unsightly microphone cable.

Metal yogi
From time to time, we like to affectionately call it our metal yogi. That's because you can adjust the height and angle of your microphone on the fly. It's an actual pro at the downward dog position!

Our designers made sure that the Streaming Boom Arm moves in all directions. It has a wide range of adjustments (up to 90 cm) and three joints – so you can easily setup the microphone to best suit your needs.

Quick and easy installation

The Streaming Boom Arm's installation is intuitive and done in the blink of an eye. It's no rocket science – just clamp it onto your tabletop wherever suits you best.

ENDORFY Streaming Boom Arm – main features:
