

Product name: ENDORFY Earpads Soft Breathing
Product code: EY0A001

The Earpads Soft Breathing are designed for users who value high comfort, lightness, and breathability, as well as a more natural sound with a wider soundstage. Made of high-quality, breathable fabric that feels pleasant to the touch, they perfectly conform to the shape of your head, ensuring comfort throughout the day – even during intense use on warmer days.

Long-lasting comfort

The fabric earpads are designed for those who spend long hours wearing headphones. Thanks to the breathable material, they let your skin breathe, significantly reducing the feeling of body heat and isolation typically associated with traditional leather earpads.

A perfect fit

The memory foam padding molds perfectly to the shape of your head and ears. By adapting to the user's unique anatomical features, the headphones fit more securely, ensuring optimal pressure and stability, while improving comfort even during long sessions of music, podcasts, games, or movies.

Natural, surround sound

The earpads offer less isolation than leather models, allowing for surround and natural sound. This makes them a perfect choice for users who prefer a wider soundstage in music, movies, or games.

Modern elegance

Elegant, high-quality fabric makes the earpads fit any style and aesthetic of headphones. Additionally, the blue LEFT and RIGHT markings provide a unique and distinctive look. It's also the easiest and quickest way to refresh your worn-out headset.

Compatibility and easy installation

The earpads are specifically designed for the Viro, Viro Plus, and Viro Infra headsets by ENDORFY, but they are also compatible with many popular models that have a similar design and dimensions. The user-friendly mounting system allows for quick and easy earpad replacement, so you can immediately enjoy improved comfort and sound quality.
