

Product name: ENDORFY Earpads Leather
Product code: EY0A003

The Earpads Leather are designed for users who won't settle for anything less than top-tier sound and everyday comfort. Crafted from high-quality PU leather and memory foam, the earpads offer lasting durability, superb comfort, and excellent sound isolation with richer, more pronounced bass.

Forever classy

With their sleek, timeless design and high resistance to wear and tear, the Earpads Leather are made to go distance. The PU leather doesn't just look great – it's so durable that you don't have to worry about them wearing out any time soon.

A perfect fit

The memory foam padding perfectly molds to the shape of your head and ears. The material adapts to the user's unique anatomical features, providing optimal pressure and stability while ensuring the headphones stay securely in place during use.

Enhanced isolation, deeper bass

The leather finish naturally boosts sound insulation, keeping distractions out and the sound locked in. Expect tighter, more focused audio with deeper low-end response – perfect for anyone who loves immersive sound with punchy bass, whether gaming, watching movies, or vibing to favorite playlists.

Modern elegance

The stylish combination of PU leather and clean profile elevates the look of your headphones. Additionally, the blue LEFT and RIGHT markings provide a unique and distinctive look. It's also the easiest and fastest way to refresh your worn-out headset.

Compatibility and easy installation

The earpads are specifically designed for the Viro, Viro Plus, and Viro Infra headsets by ENDORFY, but they are also compatible with many popular models that have a similar design and dimensions. The easy-to-use mounting system allows for quick and simple ear pad replacement, letting you instantly enjoy enhanced comfort and improved sound quality.
