

Product Name: ENDORFY Broadcast Low Profile RGB Boom Arm
Product Code: EY0A010

Sturdy, versatile and beautiful, the ENDORFY Broadcast Low Profile RGB Boom Arm won't just hold your hardware stable but will make your workspace look amazing while at it. With awesome lighting, and a low-profile frame, this stand will help you create a wonderful ambiance without being a distraction.

We designed the arm to be simple and compact to fit on any desk without taking away your precious real estate or sticking out like a sore thumb in your camera shot. What's more, our Quick Mount system will allow you to quickly install anything you need on the arm.

Sturdy but subtle

The Broadcast Low Profile RGB Boom Arm was created to ensure that your equipment remains safe, while also giving you plenty of options to line up in a way that won't intrude on your space. Whether you want to fit it under your monitors or sweep it out to the side, this arm has got you covered.

Power supply simplified

The arm also includes a built-in cable with two ports (USB-A and USB-C) to help you avoid all the needless cable spaghetti or a mess of zip ties that has frustrated many content creators in the past.

Make your mic shine

Build your ambiance thanks to our top-of-the-line LED lights controlled with a special touch button at the arm's base.

Quick mount

Mounting a microphone or webcam onto an arm can be quite a hassle. Fortunately, thanks to our Quick Mount system, you can easily swap your hardware without the need for any tools.

Not just mics

Thanks to an included set of adapters (3/8"- 5/8" or 3/8" - 1/4"), you'll also be able to mount more than just mics, giving you a great way to stabilize your phone, camera or streaming lights whenever needed.

Full control

With a ballhead mount and 360 joints, you can position your microphone wherever you need it, without being limited by the arm's dimensions. Our toolless design and locking system will also ensure that your hardware stays put without the need for constant regulation or fumbling around with wrenches and screwdrivers.

Low or high, it's your choice!

If you need more customizability, the Broadcast Low Profile RGB Boom Arm includes an 82 mm and 157 mm extensions, allowing you to set the arm's joint at the height you want it to be. Whether you need to keep it low or go high, we've got you covered.

Any desk, any time

The Broadcast Low Profile RGB Boom Arm can be mounted on virtually any desk 15 to 105 mm thick, and soft padding ensuring that your workspace will be safe throughout its use.
