

Product name: ENDORFY PBT Pudding Keycaps
Product code: EY0E002

The ENDORFY PBT Pudding keycaps are like 104 dessert boxes for your keyboard. But don't let their cute looks fool you!

We made them in Double Shot technology, so they will look brand-new even after years of ~~clicking~~ [smashing](#). They won't bow to any boss – neither in the game nor in the office.

Along with the keycaps you get a set of O-rings. We just know that the sound of a mechanical keyboard can sometimes hurt your ears, and these little ones elegantly mute every ~~hit~~ [click](#). Their assembly will take you less time than reading this description, because we have included a key puller for convenient removal of the caps.

Today we start with [dessert](#)

We made the PBT Pudding keycaps specifically for those who like backlit equipment and want to spice up their ~~battle-station~~ [desk](#). The matte finish with a milky base and distinctive font creates a truly striking aesthetic and gives any keyboard an epic look.

Double Shot = Double Endurance

We spend a lot of time at our keyboards, and we know one thing first-hand – our PBT keycaps are an unbreakable team. Literally, because each of the 104 buttons looks brand-new even after years of clicking.

It's thanks to the durable PBT material and the use of Double Shot technology in their production. During this process, two color variants of durable and abrasion-resistant polymer are injected into the mold, so our buttons do not require an additional paint finish. This is a real [shield](#) that protects against abrasion and scratches, while simultaneously keeping your fingers in place.

Let's make some ~~noise~~ [silence](#)!

Mechanical keyboards can be loud – that's no secret. Their distinctive sound has many fans (including us), but we understand that after a few hours of clicking it can hurt one's ears a little. Especially the ears of other household members.

That's why, together with PBT keycaps, we give you rubber O-rings that cushion the impact of the keycaps on the base of the keyboard and beautifully dampen the sounds. Their "installation" is a piece of ~~cake~~ [PBT](#) – simply place them on the switches and you're ready to go. Enjoy the late nights without worrying that you'll wake up your roommates (again).

Assembly in a minute

Assembling PBT Pudding keycaps takes literally a moment. We've included ~~advanced tools~~ a [key puller](#) – a small tool that allows you to remove old keycaps in a single motion. We just know that you have more important things on your mind than wrestling with the keys ;))

ENDORFY PBT Pudding Keycaps – main features:

- Double Injection Technology

- Broad keyboard compatibility
- Silencing rubber O-rings included

ENDORFY PBT Pudding Keycaps – technical specifications:

- Product code: EY0E002
- EAN: 5903018664521
- Product type: keycaps
- Color: milky-black (pudding)
- Keyboard layout: US ANSI
- Number of keycaps included: 104 pcs
- Material: PBT
- Technique: Double Injection
- Warranty: 24 months
