

Product name: ENDORFY PBT Pudding Onyx White Keycaps
Product code: EY0E003

If you like to start with dessert, then you'll love the ENDORFY PBT Pudding Onyx White keycaps. These 104 milky white boxes were created in Double Shot technology – thanks to such reinforcement they will be like new even after years of ragequits. You can ~~smash~~ [click](#) for hours, and they will remain fresh as if they just came out of the box.

Together with the keycaps, we give you a complete package with the other household members in mind – O-rings which cushion the impact of the keycaps on the base of the keyboard and dampen the sounds. Their assembly takes only a moment because we have included a key puller for your convenience.

For the most demanding ones

If we had our way, the PBT Pudding Onyx White keycaps would be in a museum of contemporary art. These little beauties add a splendid glow to your home office, as if they were our own private northern lights.

This bright accent on your desk was inspired by the white variety of onyx. It's a precious mineral that connoisseurs associate with high strength and a beautiful marble-like look.

Today we start with [dessert](#)

We made the PBT Pudding Onyx White keycaps specifically for those who like backlit equipment and want to spice up their ~~battle station~~ [desk](#). The matte finish with a milky base and distinctive font creates a truly striking aesthetic and gives any keyboard an epic look.

[Double shot](#) of PBT

When you spend much of your life at the computer, you need a team of unbreakable ~~allies~~ [keys](#). The kind that won't leave you after long hours of grinding and will look fresh like a newbie before the first quest.

You need the 104 PBT Pudding Onyx White keycaps.

It's thanks to the durable PBT material and the use of Double Shot technology in their production. During this process, two color variants of durable and abrasion-resistant polymer are injected into the mold, so our buttons do not require an additional paint finish. This is a real [shield](#) that protects against abrasion and scratches, while simultaneously keeping your fingers in place.

What's so ~~loud~~ [quiet](#)?

The sound of a mechanical keyboard is music to the ears of almost any [technology hero](#). But, after a few hours of clicking, your loved ones might go nuts – and we totally get it. That's why we added O-rings to our keycaps.

O-rings cushion the impact of the keycaps on the base of the keyboard and beautifully dampen the sounds. Their "installation" is a piece of ~~cake~~ [PBT](#) – simply place them on the switches and you're ready to go. Enjoy the late nights without worrying that you'll wake up your roommates (again).

Assembly in a minute

Assembling PBT Pudding Onyx White keycaps takes literally a moment. We've included ~~advanced tools~~ a [key puller](#) – a small tool that allows you to remove old keycaps in a single motion. We just know that you have more important things on your mind than wrestling with the keys ;)
