

Product name: ENDORFY Mouse Dock

Product code: EY0F001

Mouse Dock is a sleek charging dock – the perfect companion for the LIV Wireless mouse (also compatible with LIV Plus Wireless). With its black design and RGB backlight, it fits seamlessly into any setup, providing convenient and fast charging without the need to plug in any cables.

Low battery? Just place your mouse on the dock

No more plugging in cables to charge your mouse! When you place the LIV Wireless or LIV Plus Wireless onto the magnetic dock, the wireless charging process starts automatically without the need for an additional cable.

Striking RGB backlight

The Mouse Dock is equipped with 11 RGB modes that can be easily changed or completely turned off with a single button. This allows you to customize the look of your workspace to match the rest of your setup or current mood.

Always stable on your desk

The Mouse Dock features a non-slip, sticky rubber base, ensuring it stays firmly in place. It's also incredibly easy to clean, so you can effortlessly refresh it whenever needed.

Practical USB port

Equipped with a 1.8-meter USB cable, the Mouse Dock also features an additional USB-A 2.0 port on the front. This makes it easy to connect devices such as the USB 2.4 GHz dongle for LIV Wireless and LIV Plus Wireless. The setup reduces the distance between the receiver and the mouse, so you only need one USB port on your computer instead of two.

ENDORFY Mouse Dock – main features:

- Convenient wireless charging
- RGB backlight
- Non-slip rubber base
- Additional USB 2.0 port

ENDORFY Mouse Dock – technical specifications:
