

Product name: ENDORFY AXIS Streaming
Product code: EY1B006

Top-notch hardware right in front of you — that's the ENDORFY AXIS Streaming coming to your home studio to elevate it to new audio heights.

The black-as-night housing illuminated with [ARGB](#) backlight hides capabilities that many microphones can only dream of. Immensely versatile, it allows you to change the recording direction to best fit your content needs while delivering high-quality, clean audio in any scenario.

The purity of your recording is taken care of by the [built-in](#) pop filter and an anti-shock mount. The former blocks the explosive consonants from damaging your audience's ears, while the latter protects the mic itself from the vibrations carried through the desk.

Your recording [manager](#)

You're a renaissance person and you can do it all — streams and vlogs, podcasts and interviews, maybe even music recordings or round table discussions and tabletop games. You need hardware equally versatile and high quality. That's where the AXIS Streaming shines [the brightest](#) thanks to its multi-functional, adjustable directionality.

Pick your champion — cardioid (one direction), stereo (spatial channels), two-way (opposite sides), or omnidirectional (360° surround) characteristic, depending on what suits your needs best. Easy to adjust and clearly labeled, the top LEDs show you the currently activated mode.

The quality of your recording material will be [immaculate](#) either way, thanks to the built-in pop filter blocking the explosive consonants and an anti-shock mount protecting the mic from the vibrations carried through the desk. Enjoy the freedom of creation without having to walk on eggshells around your gear.

Creator's best friend

When you live to create and spend countless hours in front of the microphone, you need equipment that is reliable and can keep up with you on a daily basis. That's what the AXIS Streaming is — versatile and easy to set up thanks to a stable, metal base.

The sturdy base keeps the mic stable wherever you currently need it, the rubber feet preventing it from sliding around the desk. And if you want to use the Streaming or Studio Boom Arm instead — not a problem, just unscrew the mic. [You do you!](#)

Everything [Audio](#) under control

With the AXIS Streaming mic, you can easily control the quality of your recordings in real-time. This is a convenient option when podcasting or streaming and will have you sounding like a pro in [any](#) situation.

Just plug your headphones into the mic and become a sound engineer.

The AXIS Streaming has a built-in [3.5 mm](#) headphone jack along with a potentiometer that lets you conveniently adjust the listening volume at any time. It also sports a useful gain knob, so you can fine-tune the recording levels in a single, smooth movement. You can mute it in no time too — thanks to the touch button on the top of the capsule, which will light up in red whenever you're "off air".

Devil is in the details [ARGB](#)

The devil is in the details, and the AXIS Streaming is hellishly attractive — the ARGB backlight making it a real eye-catcher.

The capsule hides LEDs that light up with all the colors of the ~~wind~~ [rainbow](#). Throw a disco party at home or pick a color that fits the rest of your setup. This shining beauty is guaranteed to make your friends and viewers jealous.

You can choose from 6 different solid colors: green, cyan, blue, pink, red, yellow, or pick a colorful rainbow glow that changes flowingly. Adjust it on the fly using the button on the bottom of the mic or turn off the backlight completely by holding it for 3 seconds.

Plug & talk

Setting up the AXIS Streaming is not rocket science. The microphone comes with everything you need already included — plug it into your computer and you're good to go. Enjoy the new, superior quality of your audio!

Connect the microphone within seconds with the included USB-A cable — it's compatible with the most popular operating systems: Windows, macOS, and Linux.

ENDORFY AXIS Streaming – main features:

- Dynamic RGB effect
- Headphone jack
- Tap-to-mute with LED indicator
- Gain control
- USB Plug&Play
- Multiple polar patterns options (cardioid, stereo, bidirectional, omnidirectional)

ENDORFY AXIS Streaming – technical specifications:

- Product code: EY1B006
- EAN: 5903018664637
- Product type: microphone
- Color: black
- Dimensions: 277×127×124 mm
- Microphone type: back electret condenser
- Polar patterns:
 - cardioid
 - stereo
 - bidirectional
 - omnidirectional
- Bit depth: 24 bit

- Sampling rate: 192 kHz
- Frequency range: 30–18 000 Hz
- Pop filter: internal
- Mount type: metal base
- Shock mount: yes
- Mute button: yes (touch)
- Headphone output: yes (3.5 mm mini-jack)
- Connectivity:
 - USB-A, cable length: 2.5 m
- Compatibility:
 - laptop
 - PC
 - console
 - smartphone
- Warranty: 24 months
