

Product name: ENDORFY Solum Studio
Product code: EY1B009

The ENDORFY Solum Studio [streaming](#) microphone is equipped with a membrane that gives you that nuanced, clean, and rich sound you deserve. It's a proper breakthrough in terms of USB hardware — crystal clear voice recordings capture every detail. And with the headphone jack for mic monitoring and a convenient mute button, you can easily remain in absolute control.

To complete the set, you'll also get an adjustable microphone arm with a magnetic cover and a USB cable already hidden inside. The following steps are a cakewalk — attach it to your desk, plug it into the computer, and you're ready to ~~go~~ [record](#). This puppy can handle all your podcasts and streams without even breaking a sweat. And it looks dapper too!

No [audio](#) compromises

When you have a lot to say, you need solutions that provide you with studio-quality sound. There's no room for compromises in the audio department. With the Solum Studio, your voice is [always](#) heard loud and clear – as if you were sitting face-to-face with your community.

How does the magic happen? Solum Studio's secret lies in the ultra-precise gold-plated membrane, which never skips a beat. The perfect synergy of all its inner parts translates into ultra clean and detailed audio and ensures your audience won't miss out on anything.

Sound clarity is further enhanced by a foam cover and a [double](#) filter consisting of an outer and inner mesh with a finer layer. You don't need to take out loans or a second mortgage to have a pro audio setup – the Solum Studio has everything you need.

Side by side with your mic

We designed the Solum Studio specifically to free up as much space as possible on your desk, streaming station, or radio studio.

No need to mess with adapters or tangled cables, because “distraction-free” and “effortless” are the new normal. It’s just you, your notes, and the tall pumpkin spice latte with triple whipped cream.

This is possible thanks to the high-quality arm with a magnetic cover. Just take it off to easily remove and replace the cable hidden inside. The arm is durable and adjustable, with a wide range of settings – letting you easily position the microphone in a way that suits you best.

± You do it ~~my~~ your way

With the Solum Studio, you can easily control the quality of your recordings in real-time. This is a convenient option when podcasting or streaming and will have you sounding like a pro in any situation.

Just plug your headphones into the mic and become a sound engineer. The Solum Studio has a built-in 3.5 mm headphone jack along with a potentiometer that lets you conveniently adjust ~~everything~~ the listening volume at any time.

Silence, recording in progress!

Don’t let the noisy neighbors ruin your stream ever again and keep your private conversations private. You know firsthand that the slightest noise can spoil any recording — but now, the Solum Studio has your back.

Simply use the built-in mute button. The red backlight will let you know when you’re off-air.

Our designers deliberately placed the mute button at the bottom of the microphone, so you won’t accidentally scratch or brush against the mic and startle your audience. Besides, it’s the place you intuitively reach for in an emergency (rather than the top of the mic) — we tested it ourselves.

We hear you

The setup of Solum Studio is not rocket science, luckily. The microphone has everything you need to ~~get going~~ **keep talking** – forget having to download or purchase additional software, it's not required. Just plug it into your computer and say "Hello" to the world! This is a great option for those who prefer not to go through time-consuming and even unnecessary software installations.

Thanks to the convenient USB-A cable, connecting the microphone takes seconds. It's compatible with Windows, macOS, and Linux.

ENDORFY Solum Studio – main features:

- Studio quality, high-resolution recording
- 20 mm gold-plated membrane
- Adjustable studio boom arm
- Tap-to-mute with ring LED indicator
- Headphones output with volume control
- USB Plug&Play

ENDORFY Solum Studio – technical specifications:

- Product code: EY1B009
- EAN: 5903018665177
- Product type: microphone
- Color: black
- Dimensions: 272×610×115 mm
- Microphone type: condenser, 20 mm gold-plated membrane
- Directivity: cardioid
- Bit depth: 24 bit
- Sampling rate: 96 kHz
- Frequency range: 20–20 000 Hz
- Pop filter: internal & foam filter
- Mount type: adjustable arm
 - Desktop mount: C-clamp, max. 63 mm desktop thickness
 - Horizontal reach: 90 cm
 - Vertical reach: 100 cm
- Shock mount: no
