

Product name: ENDORFY Solum 2 Core

Product code: EY1B017

Solum 2 Core opens a new chapter in the history of ENDORFY microphones. Designed from the ground up in cooperation with a German design studio, it combines a cardioid polar pattern with the ease of use typical of USB microphones. Clear 24 bit / 96 kHz sound, a proprietary shock mount with rubber dampers, and a detachable metal pop filter make Solum 2 Core a great choice for everyday online gaming, calls, remote lessons, and simple recordings – wherever solid sound and instant muting matter.

Polish engineering, German design

Every element of the Solum 2 Core microphone was designed from scratch by the ENDORFY team. The final design was created in cooperation with a German design studio – the result is a simple, modern form that looks and sounds professional. It means complete control over every detail, from the first sketch to the finished product.

Clear sound with details

The microphone records at 24 bit / 96 kHz resolution, delivering clean and detailed sound. The high-quality condenser capsule has been precisely tuned, while the cardioid polar pattern focuses on sounds coming from the front of the microphone, helping to highlight the voice and reduce the impact of sounds from other directions.

You will get the best results by speaking directly into the front of the microphone from a distance of around 10–25 cm.

Multi-layer protection against interference

Recording clarity is protected by several structural layers working together at different stages of noise suppression. Metal pop filters reduce air blasts and plosive sounds, while the shock mount and built-in capsule damper suppress vibrations and keyboard noise. Each type of interference has its own protective layer, so the microphone captures exactly what you want to record.

Mute with one gesture

Solum 2 Core focuses on simple, intuitive operation. The touch panel on the top allows for instant and silent muting – its current status is indicated by a discreet LED placed on the front of the housing.

Proprietary next-generation shock mount

The open design of the shock mount highlights the body of the Solum, giving the whole setup visual lightness and a modern character. Instead of classic rubber bands, the microphone is held by discreet rubber dampers that effectively suppress vibrations without disrupting the aesthetics of the design.

Solum 2 Core is mounted without screws or tools – the smooth form makes it quick to remove or install the device, making transport, cleaning, and everyday use easier.

Detachable metal pop filter

The included pop filter effectively reduces plosive sounds, helping to maintain clean and clear audio during recording. Once installed, it forms a perfect circle with the shock mount, naturally completing the body of the microphone and making the whole setup look cohesive both on the desk and in front of the camera.

The slim, open construction does not dominate the frame, so the device looks good both during streams and video recordings. The pop filter can be detached at any time if you prefer a different shot or working distance.

Plug & play – a USB microphone ready to use

The microphone requires no drivers or additional software – once connected via USB-C, it is immediately ready to work with Windows, macOS, Android, and iOS systems, as well as PlayStation 4 and 5 consoles. Solum 2 Core works with most smartphones and tablets equipped with OTG functionality and a USB-C connector. The included USB-A adapter makes it easy to connect the microphone to older devices.

High-quality build

The metal construction ensures high rigidity and solidity that you can feel from the first contact with the microphone. The heavy base with a cable pass-through keeps it stable on the desk even during intensive use, while the uniform form makes the whole setup look just as good in a home workstation as in a professional setup.

Everything you need in one box

Right out of the box, Solum 2 Core is ready for recording. The set includes a heavy metal base, a proprietary shock mount, a detachable metal pop filter, a 2.5 m USB-C cable, and a USB-A adapter.

ENDORFY Solum 2 Core – main features:

- Cardioid polar pattern
- Metal construction on a heavy base
- Additional internal capsule damping
- Detachable pop filter and shock mount
- 5/8" mounting standard
- Compatibility with computers, consoles, and mobile devices
- Microphone status LED indicator
- Plug & play

ENDORFY Solum 2 Core – technical specifications:

- Product code: EY1B017
- EAN: 5903018668000
- Product type: microphone
- Color: black
- Dimensions (microphone + stand + shock mount): 100×125×210 mm
- Microphone type: condenser
- Polar pattern: cardioid
- Sampling frequency: 24 bit / 96 kHz
- Frequency response: 20 Hz – 20 kHz
- Pop filter: detachable, metal

- Mounting type: base, compatible with 5/8" arms
- Shock mount: yes
- Mute button: yes
- Headphone output: no
- Connectivity:
 - USB-C, cable length: 2.5 m
- Compatibility:
 - Windows
 - macOS
 - Android
 - iOS
 - PS4/5
 - Most smartphones with OTG functionality and a USB-C connector
- Warranty: 24 months

ENDORFY Solum 2 Core – logistics data:

- Retail box dimensions: 192×110×230 mm
- Weight (net): 0.63 kg
- Weight (gross): 0.94 kg
- Master carton dimensions: 478×205×590 mm
- Master carton weight (gross): 10.20 kg
- Product quantity in master carton: 10 pcs

Set includes:

- 1× ENDORFY Solum 2 Core
- 1× Microphone base
- 1× USB-C cable
- 1× USB-C to USB-A adapter
- 1× Shock mount
- 1× Detachable pop filter
- 1× User manual
