

Product name: ENDORFY Ventum 200 Solid
Product code: EY2A001

The black ENDORFY Ventum 200 Solid is your private safe for all the top-secret data. It's spacious, yet slender — measuring 440×211×373 mm. It can comfortably fit a full-sized ATX motherboard, up to three 2.5" disks (or 2× 2.5" and 1× 3.5", it's up to you), and as many as 7 ([seven!](#)) 120 mm fans.

We'll install one cool Stratus 120 PWM fan for you — a gift, to get you started. The ENDORFY Ventum 200 Solid can also accommodate liquid coolers: up to 240 mm on the top and 360 mm on the front of the case. With such specs (and a [perforated](#) front panel to improve the airflow!), keeping your components cool as a breeze.

Your PC's best friend <3

Sit back and relax — and allow your build to do the same. The ENDORFY Ventum 200 Solid is an airy case, keeping the temperatures low and the airflow consistent.

The ENDORFY Ventum 200 Solid has enough room for up to 7 120 mm fans, a finely perforated metal front panel (with holes smaller than 0.9 mm in diameter), and a full set of easily removable, magnetic filters — making it airy, cool, and dust-free.

Stratus for a start

Our shapely ENDORFY Ventum 200 Solid can pack up to 7 120 mm fans. The first spin is on us — for your convenience, it comes with a Stratus 120 PWM fan already pre-installed.

Developed in collaboration with Synergy Cooling, the Stratus 120 PWM fan is one of our favorites. [Quiet and efficient](#), this unsung hero runs on robust fluid dynamic bearings, and through a PWM signal you can slow it down to as little as 200 RPM. Cakewalk!

Small but spacious

It's like a [well-designed](#) woman's purse — it might not look like much from the outside (measuring only 440×211×373 mm), but it holds **a world** (of components) inside.

Inside the ENDORFY Ventum 200 Solid, you can easily fit a full-sized ATX motherboard, up to 3 2.5" disks (or 2× 2.5" and 1× 3.5", it's up to you), and as many as 7 120 mm fans. With plenty of space inside, you can install a liquid cooling system: 240 mm on the top or even a 360 mm one on the front of the case.
