

Product name: ENDORFY Fishtank 6000 Flex
Product code: EY2A026

ENDORFY Fishtank 6000 Flex is a showcase-type PC case that offers a panoramic view of your setup. Two glass panels and an elegant, slim design allow you to display your components in a unique way. Very good compatibility – including motherboards with rear connectors and SSI-CEB (E-ATX) format, as well as support for up to two 360 mm radiators – makes it a solid base for building a high-end system.

Premium design

Fishtank 6000 Flex combines panoramic component display with an elegant, timeless form. Glass panels on the front and side, combined with metal elements, give the case a lightweight design. Its slim silhouette – smaller than the Aquarius 8000 series – fits perfectly into both modern and more classic setups, without taking up as much space as most models in this class.

Convenient side I/O panel

In aquarium-style cases, access to ports is often inconvenient – or even completely out of reach. In the Fishtank 6000 Flex, the I/O panel is located at the bottom of the side panel, ensuring it is always within reach when the case is placed on a desk, regardless of its orientation. It includes a fast USB-C 3.2 Gen 2 port (up to 10 Gbps), two USB-A 3.2 Gen 1 ports (up to 5 Gbps), and a combo audio jack for headphones and a microphone.

Ready for advanced CPU cooling

Fishtank 6000 Flex offers extensive cooling configuration options – both air and liquid. The top supports large radiators up to 360 mm or 240 mm, while at the same time the side supports 360 mm or 280 mm units. It also accommodates air coolers up to 182 mm in height and supports installation of up to 9× 120 mm or 7× 140 mm fans. Such compatibility with components gives you flexibility when building a high-performance system.

Compatibility with E-ATX and back-connect motherboards

The case supports a wide range of motherboards, including ATX, microATX, Mini-ITX, and larger SSI-CEB (E-ATX). It is also designed for compatibility with back-connect motherboards such as ASUS BTF, MSI Project Zero, and Gigabyte Project Stealth.

A large space behind the motherboard tray and multiple tie-down points (including on the rear exterior) make cable routing easier, allowing you to create a clean and organized build even in more complex configurations.

Classic bottom-mounted PSU layout

Fishtank 6000 Flex is noticeably slimmer than typical panoramic glass cases. This is thanks to its classic layout with a PSU chamber – the space for the power supply is located at the bottom of the case in a separate section. This makes cable management easier, helps maintain a clean interior layout, and ensures the case does not take up too much space. The design supports ATX PSUs up to 250 mm in length (with 30 mm of additional space for cable management), and a dedicated mounting bracket simplifies installation and removal.

Vertical GPU support

Fishtank 6000 Flex is compatible with widely available vertical GPU mounting systems (bracket and riser), but does not include these accessories. The slot design without crossbars allows installation of this type of solution.

Spacious interior

The large internal volume of the case, comparable to the Arx 700 series, allows you to easily install high-performance components – including GPUs up to 445 mm long and up to 7 expansion cards. Inside, there is space for up to 3 storage drives (1× 2.5", 1× 3.5", and 1× 2.5"/3.5"). Radiator and fan installation is simplified thanks to an additional side bracket, which allows you to mount components before installing the entire module inside the case. A pre-installed PWM splitter and controller (5 connectors each) supports motherboard control or standalone operation based on predefined lighting effects. Easily removable panels and magnetic filters on the top and side, as well as a bottom filter that can be pulled out from both sides of the case, make cleaning easier.

ENDORFY Fishtank 6000 Flex – main features:

- Panoramic design with two glass panels
- Slim aquarium-style case design
- Fits two 360 mm radiators simultaneously
- Compatible with CPU coolers up to 182 mm
- Support for back-connect motherboards
- Support for up to 9 fans
- PWM splitter and ARGB controller
- Convenient side I/O panel with USB-C up to 10 Gbps
- Support for vertical GPU mounting
- Space for GPUs up to 445 mm and up to 3 storage drives
- Convenient cable management and routing

ENDORFY Fishtank 6000 Flex – technical specifications:

- Product code: EY2A026
- EAN: 5903018669441
- Product type: PC case
- Color: black
- Dimensions (H×W×L): 473×487×240 mm
- Motherboard form factor: SSI-CEB (E-ATX up to 280 mm width), ATX, microATX, Mini-ITX
- Back-connect motherboard support: yes
- Graphics card clearance (GPU): 445 mm
- CPU cooler clearance: 182 mm
- Power supply clearance (PSU): 250 mm
- Expansion slots: 7
- Number of bays:
 - internal:
 - 1× 2.5"
 - 1× 3.5"
 - 1× 2.5"/3.5"
- Cooling system:
 - Maximum number of fans: 9 (120 mm) / 7 (140 mm)
 - Number of fans included: 0

- Radiator compatibility:
 - Side: 120/140/240/280/360
 - Top: 120/240/360
 - Rear: 120/140
- Dust filters:
 - Side
 - Top
 - Bottom
- Tempered glass panel:
 - Front
 - Side
- Side I/O:
 - 1× USB-C 3.2 Gen 2 (up to 10 Gbps)
 - 2× USB-A 3.2 Gen 1 (up to 5 Gbps)
 - 1× headphones/microphone (combo minijack 3.5 mm)
 - 1× POWER button
 - 1× RESET button
 - 1× POWER LED
- Warranty: 36 months

ENDORFY Fishtank 6000 Flex – logistics data:

- Retail box dimensions: 545×307×530 mm
- Weight (net) 8.40 kg
- Weight (gross) 9.80 kg

Set includes:

- 1× ENDORFY Fishtank 6000 Flex case
- 1× Pre-installed PWM splitter with ARGB controller
- 1× Mounting screw set
- 1× Cable ties set
- 1× Hook-and-loop cable straps set
- 2× Spare side panel clips
- 1× Microfiber cloth
- 1× User manual
