

Product name: ENDORFY Fluctus 140 PWM ARGB
Product code: EY4A004

The ENDORFY Fluctus 140 PWM ARGB brings an atmospheric [ARGB](#) backlight to your chassis and a breath of colorful coolness to your tired processor. It's like a cold shower after a hard day's work, a glass of ice water on a hot night, and an air conditioning system in your car when you're stuck in traffic in summer heat. All of this at once, OFC.

It is only 14 cm tall but handles keeping most CPUs cool with ease. It never loses its cool when dealing with densely finned radiators in liquid cooling systems as well as chassis with dust filters. This fan with an optional semi passive mode fits into most cases. And it's easy to install as well – we've prepared a simple manual and haven't hesitated to ~~use~~ [provide](#) it for you.

Who is breathing ~~so loudly~~?

Working with the Fluctus 140 PWM ARGB, sometimes you will hear sounds that you've never noticed before. For example, a fly flying by, the rustle of your curtains, or the breathing of a friend sitting next to you.

It's our fault – we've designed this fan to run as [quietly](#) as possible.

We gave it blades with wavy edges that reduce the audibility of annoying noise (the psychoacoustic optimization of the Fluctus fans is patent pending). We have this theory that if we made them large enough, another ice age would ensue – they handle keeping your computer cool with ease.

Do you know the game of freeze tag?

When someone tags you, you need to stand still until another player unfreezes you. The Fluctus 140 PWM ARGB works on a similar principle – the difference is that it stops when the control signal level drops (this is the so-called optional semi passive mode). We've thrown in a PWM splitter, so you can effortlessly connect a second fan to it and control its rotational speed as well.

The ~~Boss~~ fan has been tamed!

After a few (dozen) hours at the computer crazy things can happen with the chassis - for example, it can start to vibrate slightly. This strange phenomenon is caused by the speeding fan, whose noise can throw even the calmest dudes off balance, especially if they happen to be fighting a big boss.

And this is one of those situations when you need to [tame](#) both—the fan and the boss – not the quiet homie at your computer.

That's why we've built rubber [anti-vibration](#) pads into the Fluctus frame, which isolate the fan on each axis. This prevents vibrations from being transferred to the chassis, so your hardware works quieter, and you can focus on what's the most important

Stay alpha [RGB](#), baby

If you like hardware that attracts attention and looks out of this world, then you're going to love the Fluctus 140 PWM ARGB. Colored backlighting is a terrific thing if you like to sit at your computer in the dark or want your battle station to

give your jealous buddies hypertension.

With **ARGB** illumination, you can match the appearance of the fan with your battle station. The backlight is compatible with popular motherboards and ARGB controllers (including ENDORFY products), so you can easily synchronize them with your Fluctus.

The ARGB version works just as well as its non-backlit brother. They share the same design; we'd never sacrifice performance for a cool look.

Without ~~With~~ an extension cord

The Fluctus 140 PWM ARGB is a cooler you can install in minutes – even if you are assembling your computer for the first time. We've included an additional extension cord with the fan, so you can easily route the cable even in a large chassis. We've also added a step-by-step manual to guide you through the process.

6-year warranty

We are confident about the quality of equipment bearing the ENDORFY logo - especially since the Fluctus 140 PWM ARGB glides on a durable FDB bearing. That's why it comes with an extended, 6-year warranty that covers the entire cooling system (although you probably won't use it anyway).

ENDORFY Fluctus 140 PWM ARGB – main features:

- Bright ARGB illumination
- High performance against flow restrictions
- Improved acoustic performance
- Extended fan speed range
- Long-life FDB bearing
- PWM control with automatic fan stop
- Integrated anti-vibration pads
- PWM signal splitter and 40 cm extension cable

ENDORFY Fluctus 140 PWM ARGB – technical specifications:

- Product code: EY4A004
- EAN: 5903018665979
- Product type: PC fan
- Fan dimensions: 140×140×25 mm
- Fan bearing: FDB
- Fan speed: 250 (±100) – 1800 (±10%) rpm
- Control (speed): PWM
- Connector (fan): 4-pin (power, male and female)
- Voltage (fan): 12 V
- Current (fan, peak): 0.40 A
- Control (LED): ARGB
- Connector (LED): 3-pin (ARGB, male and female)
- Voltage (LED): 5 V
- Current (LED, peak): 0.30 A
- MTBF: 100 000 h
- Warranty: 72 months

ENDORFY Fluctus 140 PWM ARGB – logistics data:

- Retail box dimensions: 165×32×151,5 mm
- Weight (net): 159 g
- Weight (gross): 243 g
- Master carton dimensions: 670×345×330 mm
- Master carton weight (gross): 20.40 kg
- Product quantity in master carton: 80 pcs

Set includes:

- 1× Fluctus 140 PWM ARGB fan
- 1× 40 cm PWM extender
- 4× Screw
- Safety instructions
