

Product name: ENDORFY Thock TKL Pudding Onyx White Blue
Product code: EY5A007

The ENDORFY Thock TKL Pudding Onyx White Blue is one of our absolute favorites. Inspired by a rare variety of the precious mineral onyx, it's both a beauty and a beast.

Win-win. From the outside, it's a little work of art – a stunning [bright](#) chassis crowned with 87 Pudding keys shimmering in the brilliant glow of its ARGB backlight. Beneath those durable keycaps (which are Double Shot, of course) – neat rows of Kailh Blue mechanical switches. Let them sing you the “clicky” song of their people.

Merry [Beautiful](#) and bright

The Thock TKL Pudding Onyx White Blue is perfect for technology heroes who don't settle or compromise. You can have it both ways – minimalist and eye-catching. The keyboard's bright chassis with backlit [Pudding](#) keycaps is what makes everyone “Wow!”.

This stunning centerpiece on your desk was inspired by the white variety of onyx – a precious mineral, known for its high durability and unique beauty. Makes your friends go mad with envy!

Whenever you want to switch things up a little around the home office, you can activate the brilliant ARGB backlighting with a single click. And let there be light! The aluminium top plate reflects its glow beautifully, making it appear almost... incandescent.

Tiny masterpiece

The Thock TKL Pudding Onyx White Blue is a small work of art, but a work of art nonetheless.

Its elegant chassis is just over [42 cm](#) wide, leaving you more room for mouse maneuvers. And yes, you'll fit a double latte there too – you're welcome!

To make all of that happen, we ditched the numpad entirely. The Thock TKL Pudding Onyx White Blue is small and ready for “Action!”.

Keycaps to die for

With the Thock TKL Pudding Onyx White you have 87 [Pudding](#) keys with ARGB at your disposal. They'll attract envious glances wherever you two go.

With just one click, you can change the whole vibe – go from a rainbow glow to total monochrome. Or if you so wish, turn off the backlighting entirely. The Thock TKL Pudding Onyx White looks stunning in any setting.

It's all thanks to the special technique we used to bring these two-colored keycaps to life – Double Shot. During that process, two separate layers of heavy-duty PBT polymer are injected into the mold. The rigid top keeps the keycaps from wearing out and the milky white bottom (where the name comes from) shines with bright ARGB light.

“Click” for a quick click

Some say that curiosity killed the cat – but it’s always better to know what secrets are hidden beneath the keycaps on your keyboard. In the Thock TKL Pudding Onyx White Blue, you’ll find the Kailh [Blue](#) – “clicky” mechanical switches that’ll obey your every command. They’re more dependable than your best buddy.

Kailh Blue are clicky switches, known for their distinctive activation sound. It’s clear when the keypress actually happens, and they work well in scenarios requiring fast and flawless movements. They’re also durable, with an estimated lifespan of as many as 50 m clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

Beauty and a beast

Eat a cake and have it too – the Thock TKL Pudding Onyx White Blue is both a beauty and a beast.

Every aesthete will appreciate the unique, bright chassis. It looks sensational in the home office and on camera. On top of everything else, it can survive intense clicking and arduous travels for hours on end. Don’t ask us how we know this.

Its chassis reinforced with an aluminium ~~shield~~ [top](#) is rigid and damage-resistant – ready to withstand the toughest conditions. Its grip firm, so it doesn’t move around the desk even when you’re gaming or working for hours on end. It looks the part too – engraved patterns on the bottom and ARGB backlight giving it a fierce edge.

My name is RGB. ARGB

Let’s face it – ~~things~~ [keyboards](#) without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then ARGB is a must-have.

Customize the look of the Thock TKL Pudding Onyx White Blue to complete the battle station of your dreams. Highlight each of the 87 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard – without installing anything.

Perhaps some will say it’s unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, ARGB backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the Thock TKL Pudding Onyx White Blue with two-step adjustable feet. With them, you can place the keyboard at an angle that best suits your needs.

Cable management made easier

The Thock TKL Pudding Onyx White Blue keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a detachable cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

Everything Software under control

Do you like to have everything under control? We thought of that – and equipped the Thock TKL Pudding Onyx White Blue with functional and feature-packed software.

We fondly refer to it as "God mode". With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock TKL Pudding Onyx White Blue – main features:

- TKL mechanical keyboard
- Sleek shape and stylish white design
- Configurable RGB backlighting
- High durability
- Kailh Blue mechanical switches
- Durable PBT keycaps
