

Product name: ENDORFY Thock TKL Pudding Onyx White Brown
Product code: EY5A008

The ENDORFY Thock TKL Pudding Onyx White Brown is simply extraordinary. We took inspiration from Mother Nature herself – styling it after [white](#) onyx, a precious mineral that looks a bit like marble (but better & stronger). And our keyboard is exactly that – beautiful as the dawn, stronger than the foundations of the earth.

Its small, brilliant chassis with ARGB backlighting and Pudding keycaps will brighten up your home office. In addition, under each of the PBT keys (made even more durable thanks to the Double Shot technology), lies a hidden mechanical Kailh Brown switch. An ideal solution for those endless hours of clicking.

Crown jewel of your desk

The Thock TKL Pudding Onyx White keyboard will quickly become the crown jewel of your desk. It's just that good – and spices up any setup and room it might find itself in.

This bright centerpiece on your desk was inspired by the white variety of onyx – a precious mineral, known for its high durability and unique beauty. Makes your friends go mad with envy!

Whenever you want to switch things up a little around the home office, you can activate the brilliant ARGB backlight with a single click. And let there be light! The aluminium top plate reflects its glow beautifully, making it appear almost... incandescent.

Crème de la-~~crème~~ [onyx](#)

The Thock TKL Pudding Onyx White is a true gem among ~~stones~~ [keyboards](#).

Its bright chassis with dazzling ARGB backlighting draws the envious eye of your friends and brightens up the entire room. But what's most impressive is its compact size. You can easily fit it even on a small desk, freeing up space for a few gadgets.

To make all of that happen, we ditched the numpad entirely. The Thock TKL Pudding Onyx White Brown is small and ready for "Action!".

Milky ~~Way~~ [White](#)

One of the first things anyone notices about the Thock TKL Pudding Onyx White are the milky white [Pudding](#) keycaps. These unique keys are what makes it so mesmerizing, allowing you to play with the look of the keyboard to your heart's delight.

One click is all it takes to instantly switch between a monochrome glow to a radiant rainbow display. And if your boss video calls you out of the blue – just turn the ARGB off and end the party. The keyboard will still look dapper as hell.

It's all thanks to the special technique we used to bring these two-colored keycaps to life – Double Shot. During that process, two separate layers of heavy-

duty PBT polymer are injected into the mold. The rigid top keeps the keycaps from wearing out and the milky white bottom (where the name comes from) shines with bright ARGB light.

Silence is (Kailh) Brown

If you like to spend your nights over the keyboard in peace – and without having to worry about waking up your roommates with the clickity-clack clack – then the Thock TKL Pudding White Brown is a great choice. Thanks to its Kailh Brown switches, [no one](#) will interrupt your late-night plans of taking over the world.

Kailh Brown are tactile switches, made for situations that require smooth and subtle movements. They're also durable, with an estimated lifespan of as many as 50 m clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

And as a bonus, the keyboard is quite... quiet. We're sure it'll find many fans among night owls (and their grateful roommates).

Harder, better, faster, onyx

It's in the name! The Thock TKL Pudding Onyx White Brown is as hard as onyx. It can survive long hours of work and evening gossip parties with besties. It'll even withstand your Kitty goose-chasing its pretty ARGB lights.

Its chassis reinforced with an aluminium ~~top~~ [shield](#) is rigid and damage-resistant – ready to withstand the toughest conditions. Its grip firm, so it doesn't move around the desk even when you're gaming or working for hours on end. It looks the part too – engraved patterns on the bottom and ARGB backlight giving it a fierce edge.

My name is RGB. ARGB

Let's face it – ~~things~~ [keyboards](#) without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then ARGB is a must-have.

Customize the look of the Thock TKL Pudding Onyx White Brown to complete the battle station of your dreams. Highlight each of the 87 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard – without installing anything.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, ARGB backlighting is the thing for you.

Adjustable angles

The Thock TKL Pudding Onyx White Brown keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a detachable cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

Everything Software under control

Do you like to have everything under control? We thought of that – and equipped the Thock TKL Pudding Onyx White Brown with functional and feature-packed software.

We fondly refer to it as “God mode”. With its help, you’ll adjust all keyboard settings to your needs – whether it’s changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock TKL Pudding Onyx White Brown – main features:

- TKL mechanical keyboard
- Sleek shape and stylish white design
- Configurable ARGB backlighting
- High durability
- Kailh Brown Mechanical Switches
- Durable PBT keycaps
- Detachable cable
