

Product name: ENDORFY Omnis Pudding Onyx White Blue
Product code: EY5A034

The ENDORFY Omnis Pudding Onyx White Blue is a complete package. The [bright](#) chassis with a volume wheel brings out the Pudding PBT keycaps and dazzling ARGB backlighting. Look a bit closer and you'll find a Kailh Blue mechanical switch underneath each of the milky white keys. These are one of our favorite switches because they sing their song with every tangible activation. You don't even have to look to know that the command was obeyed – just listen to them work.

Your wrists will thank you for the respite provided by the magnetic ~~pillow~~ [wrist rest](#) included with the [EY5A034]. It's surprisingly comfy and will keep you well-rested for the evening gaming session. A perfectly balanced life, as all things should be.

So beautiful it makes your friends mad

The Omnis Pudding Onyx White Blue is a real magnet for envious stares. You best prepare before inviting your friends over!

This bright centerpiece on your desk was inspired by the white variety of onyx – a precious mineral, known for its high durability and unique beauty. Whenever you feel like changing things up a bit at your home office, you can activate the ARGB backlighting with a single click. The [aluminum](#) chassis reflects its glow beautifully, making it appear almost... incandescent.

The world is ~~in~~ [under](#) your hands

With the Omnis Pudding Onyx White Blue keyboard, the world is ~~in your hands~~ [at your fingertips](#). It's versatile and comfortable to work on – thanks to the numpad even complex calculations no longer look scary. And when you're done with your day job (wasn't that a breeze?), it's time for the night's fun – play games, create, and chat with friends. Omnis gives you opportunities, but the choice is always yours.

The Omnis Pudding Onyx White Blue is a full-sized mechanical keyboard with an aluminum top. We designed it to flawlessly support you in every task – without warping or getting scratched. Additionally, it stays firmly put on the desk and doesn't slide even during intensive work.

And it looks good too – the distinctive shape and ARGB backlight giving it a fierce edge.

104 desserts

Looking at the Omnis Pudding Onyx White Blue it's impossible not to instantly notice the 104 milky white keys. Each one resembles a small dessert box – but don't let their cute looks fool you! Thanks to the ARGB backlight you can make them look dramatic or even menacing. All it takes is one click and a bit of imagination.

It's all thanks to the special technique we used to bring these two-colored keycaps to life – [Double Shot](#). During that process, two separate layers of heavy-duty PBT polymer are injected into the mold. The rigid top keeps the keycaps

from wearing out and the milky white bottom (where the name comes from) shines with bright ARGB light.

“Clicky” for a [quick](#) click

You live fast, game hard, and never ask for special treatment. In your competitive world, there’s no time for lag or unexpected freezes (even in the winter). Say no more – you deserve hardware that can keep up with you, so let us introduce you to Kailh Blue.

Kailh Blue are clicky switches, known for their distinctive activation sound. It’s clear when the keypress actually happens, and they work well in scenarios requiring fast and flawless movements. They’re also durable, with an estimated lifespan of as many as 50 m clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

Magnetic wrist support

With long hours at the PC comes great responsibility ([to your wrists](#)) – it’s only natural that they call for backup when you spend half your life at the desk. Here’s where the Omnis Pudding Onyx White Blue and its magnetic wrist rest come to play (pun intended).

Equipped with magnets, it’s easy to install and holds the keyboard tight. If you prefer, you can even place it at a distance from your Omnis – thanks to the wide rubber feet, it remains stable in any position.

Let’s make some noise!

We all like to feel like we’re in a music video sometimes (riding in a car, staring out the window – anyone?). Take a break, blast your favorite track, and jump into another dimension. Even if only for a couple of minutes.

The Omnis Pudding Onyx White Blue doesn’t have a physical teleport button ([yet](#)), but the volume wheel is the second-best thing. With just a subtle flick of your finger across the keyboard, you can make some noise and cut yourself off from the world. Or make it quiet – if neighbors deserve the mercy.

That’s possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

My name is RGB. ARGB

Let’s face it – keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then ARGB is a must-have.

Customize the look of the Omnis Pudding Onyx White Blue to complete the battle station of your dreams. Highlight each of the 104 keys in a different color, differentiate the core keys with a separate hue or set a single effect for across the board. You can do this with the help of the included software or directly from the keyboard – without installing anything.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the ARGB backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the Omnis Pudding Onyx White Blue with two-step adjustable feet. With them, you can place the keyboard at an angle that best suits your needs.

Cable management made easier

The Omnis Pudding Onyx White Blue keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a detachable cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

Everything under control

Do you like to have everything under control? We thought of that – and equipped the Omnis Pudding Onyx White Blue with functional and feature-packed software.

We fondly refer to it as "God mode". With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Omnis Pudding Onyx White Blue – main features:

- Full-size mechanical keyboard with a numeric block
- Sleek shape and stylish white design
- Configurable RGB backlighting
- High durability
- Palm rest with magnetic fastening
- Metal volume wheel
- Kailh Blue mechanical switches
- Durable Pudding PBT keycaps
- Detachable cable
- Two-step feet
- N-Key Rollover function
- Functional software

ENDORFY Omnis Pudding Onyx White Blue – technical specifications:

- Product code: EY5A034
- EAN: 5903018665047
- Product type: keyboard
- Type of keyboard: mechanical
- Color: white
- Dimensions: 453×210×45 mm
- Number of keys: 104
- Switch type: Kailh Blue RGB
- Switch color: blue
- Hot-swap: no
- Keycap material: PBT

- Keycap manufacturing technology: double shot
- Keycap color: milky-white (pudding Onyx White)
- Backlight type: RGB
- Connectivity:
 - Gold-plated USB, cable length: 1.8 m
- Keyboard specific features:
 - N-Key Rollover: full
 - Anti-ghosting: full
