

Product name: ENDORFY Thock TKL Wireless Red
Product code: EY5A080

The ENDORFY Thock TKL Wireless Red is one of those small keyboards that you fall in love with at first sight [click](#). It dominates in games, creative challenges and excels at work too, but most importantly — it can do it all wirelessly, from the cozy comforts of your couch.

Under each button, we installed ultra-durable Kailh Box Red mechanical switches. They have an insane lifespan of 70 m clicks. And if you ever feel like ~~spicing~~ [switching](#) things up a bit, we added hot-swap too — giving you the possibility to easily change to any 3- or 5-pin switches.

And the cherry on top — the reinforced aluminum top and Double Shot PBT keycaps protect the keyboard from damage like armor, guaranteeing it'll look brand-new even after months of intense use.

Room to grow

Every day brings different challenges — races, dragons, deadlines... It's a hectic life that takes up a lot of time [and space](#). That's why we created the Thock TKL Wireless Red: a small keyboard that can keep up with any and all tasks, and gives you space for other fancy gadgets.

It's small — shorter by the numpad section (hence the "[TKL](#)") than a standard, full-sized keyboard — making it easy to fit it even on crowded tabletops. For additional convenience, we designed it to allow you to choose the routing of the cable through special channels on the bottom. Place it closer to the grommets or the edge of the table, whatever suits you best. Cable management made easy.

Three ways

It's good to have options. And we give you three in terms of connectivity. Wired peripherals generally are ok, but nothing beats relaxing on a couch while maintaining perfect control of your PC.

Pair your PC, tablet, or smartphone via lag-free Bluetooth or 2.4 GHz connections. For a more old-school vibe, use the included [USB-C](#) cable.

The ultimate package

The Thock TKL Wireless Red comes armed to the teeth — it's the ultimate package for the most demanding of users. Ultra-fast and long-lasting Kailh [Box](#) Red paired with hot-swap make you the proper lord of the switches.

Kailh Box Red are "linear" and always ready to pounce. They excel in situations where you need to react immediately. In comparison to the standard Kailh Red, they have an additionally reinforced stem structure. With gear like this, they're an elite commando unit ready for a mission — tireless and ultra-durable. [70 m](#) clicks are no joke.

The Thock TKL Wireless Red has also a truly PRO option for tech geeks — hot-swap, the ability to easily swap switches in and out. The keyboard is compatible with both 3- and 5-pin switches, so you can take your pick from a wide range of models available on the market.

Sturdy, sturdier, [PBT](#)

PBT means no worries — for the rest of your days. The Thock TKL Wireless Red is no feeble thing — it gives you the freedom to work, create and play for hours and hours on end, without the fear of ruining the keys. Even after months of intensive ~~playing~~ [clicking](#), each one will still look brand-new.

It's thanks to the heavy-duty PBT keycaps and Double Shot technology that the keyboard boasts such high durability. During the manufacturing process, two separate layers of rigid and abrasion-resistant polymer are injected into the mold. The bottom line: our keys don't require additional surface finish (unlike painted keycaps) — PBT is like armor that also keeps your fingers in place.

Full Metal [Keyboard](#)

You don't have to worry about the Thock TKL Wireless Red's feelings or walk around it on eggshells. It's sturdy and fears nothing — thanks to the [aluminum](#) top plate, you can take it with you wherever you go without the risk of scratches.

Its [reinforced](#) chassis gives it a defense bonus, so it's super rigid and resistant to damage. Additionally, it stays firmly put on the desk and doesn't slide around like a madman during even the most intense "work".

Let there be ~~light~~ [ARGB](#)

Keyboards without backlights are fiiiine... but if you want to really stand out from the crowd, then [ARGB](#) is the way to go. With just a single click, you can make your setup look like a proper spaceship (or a unicorn's dream, no judgment here).

With Thock TKL Wireless Red, you can easily customize the look of the keyboard to match the rest of your battle station. Highlight each of the 87 keys separately, change the color of the core hotkeys or set a single effect across the board. You can use the included software or do it directly from the keyboard — without installing anything.

Comfort is king

For your uncompromised convenience, the Thock TKL Wireless Red is equipped with adjustable feet. Pick the height that best suits your needs.

And if you want additional support, you can equip it with a matching Thock TKL Palm Rest — a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC.

Activate the God mode

Like to have [absolute](#) freedom and full control? We do too — so we added functional and feature-packed software to the Thock TKL Wireless Red. Do it your way.

We fondly refer to it as "God mode". With its help, you'll adjust all keyboard settings to your needs — whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock TKL Wireless Red – main features:

- Programmable ARGB lighting
- Detachable cable
- PBT double-shot keycaps
- Hot-swappable switch sockets

ENDORFY Thock TKL Wireless Red – technical specifications:

- Product code: EY5A080
- EAN: 5903018666587
- Product type: keyboard
- Type of keyboard: mechanical
- Color: black
- Layout: US
- Dimensions (L×W×H): 361.5×140×42.5 mm
- Number of keys: 87
- Switch type: Kailh Box Red
- Switch color: red
- Hot-swap: yes
- Keycap material: PBT
- Keycap manufacturing technology: double shot
- Keycap color: black
- Backlight type: RGB
