

Product name: ENDORFY Celeris 1800

Product code: EY5A124

The ENDORFY Celeris 1800 keyboard seamlessly combines elegant design with meticulous engineering. Its compact layout, custom switches, and optimized acoustics ensure that every keypress is smooth, precise, and satisfying. Perfect for those who appreciate aesthetics without compromising on comfort and versatility.

Universal 1800 layout

With 100 keys, including a full numeric keypad, the Celeris 1800 offers an excellent alternative to full-size keyboards, making it perfect for both gaming and everyday work. The 1800 layout optimizes desk space while providing the full functionality of a standard-sized keyboard.

Windows, macOS... You choose

The Celeris 1800 is fully compatible with both Windows and macOS, allowing you to tailor the keyboard to your setup's needs. Simply use the switch located on the right side of the chassis to smoothly switch between systems. The package also includes three macOS-specific keycaps to make customization even easier.

Choose the best connection

Pair the keyboard with your PC or console, and switch between them effortlessly using the convenient switch on the right side of the chassis. The Celeris 1800 supports Bluetooth, a 2.4 GHz wireless transmitter (with up to 120 hours of battery life depending on settings), and a USB cable, allowing you to seamlessly transition from work mode to your favorite game in seconds.

Full control in one place

Inspired by proven smartphone solutions, the SideTune lets you control the volume without taking your hand off the mouse. You can also change its function to macros, popular office shortcuts, or media key controls and mouse buttons.

Perfectly tuned components

Every element of the Celeris 1800 is designed to deliver the highest level of comfort during use. The next-gen snap-on chassis is tightly filled with two layers of silicone, effectively reducing any vibrations that occur during typing. The resulting keystroke is warm and pleasant to the ear.

Exceptional typing experience

The top plate, made of fiberglass-reinforced epoxy laminate, ensures that the Celeris 1800 won't bend under (key) pressure. Combined with factory-lubed stabilizers under each of the longer keys, the keyboard provides an exceptional typing experience.

Technology in the service of comfort

Factory-lubricated dual-rail switches guarantee smoothness and precision with every keystroke. The two-stage, compressed spring construction maintains relatively consistent pressure force differences, making the keyboard perfect for fast typing.

Smoothness and precision

Experience unmatched typing experience with linear ENDORFY Yellow switches co-developed with Gateron. They offer a very smooth and quiet "travel" with a deep, warm sound accentuating the press.

To further personalize the keyboard to your liking, the Celeris 1800 features hot-swap allowing you to change switches with just a few simple steps. We have also included two spare switches in the set, just in case.

Tailored to your needs

The keyboard's software offers a wide range of customization options. You can configure the SideTune buttons, adjust the type and color of the backlight, and create your own macros. The software also works wirelessly when the USB dongle is plugged in.

ENDORFY Celeris 1800 – main features:

- Universal 1800 layout with full numeric keypad
- Windows and macOS compatibility
- Bluetooth, 2.4 GHz dongle, or USB cable connection
- SideTune
