

Product name: ENDORFY Thock V2 TKL

Product code: EY5A126

Find your flow with the Thock V2 TKL. The next generation of Thock keyboards has been reimagined for improved comfort, delivering seamless performance while incorporating top-tier features. Its TKL layout, paired with ENDORFY Red switches, hot-swap, and fine-tuned acoustics, make it perfect for those who value comfort and versatility.

Built to last

The Thock V2 TKL is engineered to impress even the most discerning users. Built from premium materials and reinforced with a rigid aluminum top plate, the chassis offers a solid, well-balanced feel that stays comfortable and dependable — even after years of heavy use.

Hear the difference

Our goal? A typing experience that feels as good as it sounds. That's why the Thock V2 TKL is lined with three layers of acoustic foam — PORON and EPDM as well as IXPE — to minimize echo and eliminate that hollow typing noise. Even the spacebar is dampened with silicone pads, giving you a clean, satisfying sound from Esc to right Enter.

Smooth operation with ENDORFY Red

The Thock V2 TKL features exclusive ENDORFY Red mechanical linear switches — fast, responsive, and purpose-built for gamers, drawing inspiration from the acclaimed ENDORFY Yellow. Their milky housing enhances light diffusion through the keycap, while the factory-lubed, nylon-based design ensures smooth keystrokes with a deep, clear acoustic profile.

Software on your terms

The included software gives you full control — from customizing backlight type and color to remapping keys and creating macros.

Everything you need, included

The Thock V2 TKL comes with a full set of accessories. In the box, along with the keyboard and USB cable, you'll find keycap and switch pullers for effortless hot-swapping. We've also included two spare ENDORFY Red switches — just in case.

ENDORFY Thock V2 TKL – main features:

- Factory-lubed ENDORFY Red switches
- High-grade chassis reinforced with a rigid aluminum top plate
- Three layers of foam (PORON, EPDM, IXPE) to eliminate vibrations and improve acoustics
