

Product name: ENDORFY Thock V2 75%

Product code: EY5A127

Find your flow with the Thock V2 75%. The next generation of Thock keyboards has been reimagined for improved comfort, delivering seamless performance while incorporating top-tier features. Its 75% layout, paired with ENDORFY Red switches, hot-swap, and fine-tuned acoustics, make it perfect for those who value comfort and versatility.

Built to last

The Thock V2 75% is engineered to impress even the most discerning users. Built from premium materials and reinforced with a rigid aluminum top plate, the chassis offers a solid, well-balanced feel that stays comfortable and dependable — even after years of heavy use.

Hear the difference

Our goal? A typing experience that feels as good as it sounds. That's why the Thock V2 75% is lined with three layers of acoustic foam — PORON and EPDM as well as IXPE — to minimize echo and eliminate that hollow typing noise. Even the spacebar is dampened with silicone pads, giving you a clean, satisfying sound from Esc to right Enter.

Smooth operation with ENDORFY Red

The Thock V2 75% features exclusive ENDORFY Red mechanical linear switches — fast, responsive, and purpose-built for gamers, drawing inspiration from the acclaimed ENDORFY Yellow. Their milky housing enhances light diffusion through the keycap, while the factory-lubed, nylon-based design ensures smooth keystrokes with a deep, clear acoustic profile.

Software on your terms

The included software gives you full control — from customizing backlight type and color to remapping keys and creating macros.

Everything you need, included

The Thock V2 75% comes with a full set of accessories. In the box, along with the keyboard and USB cable, you'll find keycap and switch pullers for effortless hot-swapping. We've also included two spare ENDORFY Red switches — just in case.

ENDORFY Thock V2 75% – main features:
