

Product name: ENDORFY Thock V2 TKL Wireless
Product code: EY5A130

Find your flow with the Thock V2 TKL Wireless. The next generation of Thock wireless keyboards has been reimagined for improved comfort, delivering seamless performance while incorporating top-tier features. Its TKL layout, paired with proprietary switches ENDORFY Yellow by Gateron, hot-swap, and fine-tuned acoustics, make it perfect for those who value comfort and versatility.

Multiple connections, multiple uses

Work or play, laptop or console — you've got it all within reach. Connect via Bluetooth, a 2.4 GHz wireless transmitter, or a USB cable and switch between devices effortlessly using the built-in toggle. You can jump from work to your favorite game in no time.

Built to last

The Thock V2 TKL Wireless is engineered to impress even the most discerning users. Built from premium materials and reinforced with a rigid aluminum top plate, the chassis offers a solid, well-balanced feel that stays comfortable and dependable — even after years of heavy use.

Hear the difference

Our goal? A typing experience that feels as good as it sounds. That's why the Thock V2 TKL Wireless is lined with three layers of acoustic foam — two PORON and one IXPE — to minimize echo and eliminate that hollow typing noise. Even the spacebar is dampened with silicone pads, giving you a clean, satisfying sound from Esc to right Enter.

Smoothness and precision with ENDORFY Yellow by Gateron

The Thock V2 TKL Wireless features custom linear switches co-developed with Gateron — exclusive ENDORFY Yellows, first introduced in our flagship Celeris 1800.

The switches deliver exceptional smoothness and precision. With a factory-lubed dual-rail design, nylon base, and a two-stage spring, each keystroke feels effortlessly fluid and sounds deep and warm. Combined with pre-lubed stabilizers under every long key, the result is a truly refined and satisfying typing experience.

Software on your terms

The included software gives you full control — from customizing backlight type and color to remapping keys and creating macros. It even works wirelessly with the USB dongle plugged in, so your setup stays fully manageable at all times.

Everything you need, included

The Thock V2 TKL Wireless comes with a full set of accessories. In the box, along with the keyboard, USB cable, and 2.4 GHz dongle, you'll find keycap and switch pullers for effortless hot-swapping. We've also included two spare ENDORFY Yellow switches and minimalist gray Esc and Enter keycaps for a sleeker, more refined look.

ENDORFY Thock V2 TKL Wireless – main features:
