

Product name: ENDORFY LIX Plus Wireless
Product code: EY6A007

Elite among mice, the ultralight ENDORFY LIX Plus Wireless doesn't shy away from a challenge. It's a technology hero's true best friend – a powerful and loyal companion of any gamer and creator, no matter the ~~quest~~ [task](#).

Lightning quick and precise, it'll withstand any storm thanks to its top-notch components. Inside of it beats the state-of-the-art PixArt PAW3370 sensor, paired up with extra durable Kailh GM 8.0 mechanical microswitches. Why settle for less if you can have the best?

Men ~~Mice~~ In Black

No need to beat around the bush, the LIX Plus Wireless is here to win it all. It's furiously fast, impeccably precise, and ready for the toughest of challenges. A real diamond among stones.

At the very core of the LIX Plus Onyx White's insane performance lies the [battle-proven](#) PixArt PAW3370 sensor. It's ultra-precise (up to 19 000 DPI) and ensures that the cursor position remains constant even when reaching the edge of the pad forces you to lift the mouse for a moment (LOD between 1mm and 2mm). Imagine what performance you can have! But the high-tech sensor comes with other perks too – it's flexible and adapts to your playstyle. You can fine-tune its Lift-Off distance, polling rate, and even debounce time for that extra edge against your opponents. Imagine the possibilities!

69 g of epic

The LIX Plus Wireless is a lightweight ([69 g](#)) champion who knows no limits. One of the secrets behind its unparalleled agility is the honeycomb structure – which keeps the mouse slender, while simultaneously guaranteeing your hand remains sweat-free even in the heat of the moment.

The breathable housing ensures proper air circulation and keeps your busy hand cool. Additionally, The LIX Plus Wireless is equipped with slick PTFE feet to make sure it'll slide across any mousepad effortlessly.

Click and [conquer](#)

To prepare the LIX Plus Wireless for any task and challenge, we equipped it with battle-proven Kailh GM 8.0 mechanical switches. You can flickshot for days and they won't even break a metaphorical sweat.

The Kailh GM 8.0 are quick to act [and long-lasting](#) – their lifespan estimated at 80 m clicks means you can click to your heart's delight. If you're in the market for reliable microswitches that'll last years, then place your bets on the Kailh GM.

Unleash the ~~Kraken~~ mouse!

The early bounds of your desk no longer apply – take it where your conquest takes you (including your couch). The convenience of the LIX Plus Wireless is hard to overstate.

You might instantly develop an allergy to cables. Consider yourself warned.

2.4 GHz wireless connectivity ensures a stable connection with 100% precision and 0 delays, giving you the edge in any duel. Just sit down and do your thing, wherever. All you need to do is plug the adapter (conveniently hidden in a magnetic compartment on the bottom) into your computer and voilà.

Shining, shimmering, splendid

Let's face it – The LIX Plus Wireless looks epic. Make it truly unique by customizing the ARGB backlight to match the colors of your war room.

With the LIX Plus Wireless you can backlight the ENDORFY logo, the scroll wheel, and even the strip around the back of the case. Pick your own color or use one of the predefined effects – you can also quickly change the configuration using the dedicated software.

Quick winning, quick charging

The LIX Plus Wireless doesn't tire easily. Outfitted with a heavy-duty battery and an extremely power-efficient sensor to prolong its wireless adventures, it doesn't require your constant attention.

So you can focus on the game instead of worrying about the battery level.

When the power level drops to dangerous levels (below 25%), the scroll wheel starts flashing red. It's a sign that a quick charging session is in order. But don't worry, you can just plug in the USB-C cable and continue gaming without interruptions.

Trust your ~~guts~~ LIX's software

With LIX Plus Wireless in your hand, you ~~live~~ [click](#) as you like. Thanks to the dedicated software, you have full control over the mouse and all its perks. Make your own rules – change the sensitivity and LOD, customize the ARGB backlight, and record macros.
