

Product name: ENDORFY LIX Plus Onyx White Wireless
Product code: EY6A009

Mirror, mirror on the wall, who's the fairest one of all? Well, duh. The ENDORFY LIX Plus Onyx White Wireless has the looks and the brains to provide you with a flawless technological backup in any scenario. And it just might turn your friends green with envy too! Equipped with the state-of-the-art PixArt PAW3370 sensor and [extra-durable](#) Kailh GM 8.0 mechanical microswitches, the LIX Plus Onyx Wireless gives you the edge in any virtual duel.

With a maximum DPI of 19 000, it's a true lightweight champion among mice. Its honeycomb structure keeps the mouse slender (69 g only) and guarantees you a sweat-free experience. A beauty and a beast!

Knight in shining armor

Black mice are fine and dandy. But with the LIX Plus Onyx White Wireless at your disposal, you'll quickly realize you can't take your eyes (and hands) off it. And you won't have to!

We drew our inspiration for the Onyx White series from Mother Nature herself – modeling the mouse after a rare and durable mineral, the elegant white onyx. Famous among connoisseurs for its high strength and extraordinary beauty, the gemstone is like a better and prettier version of marble. Luckily, the mouse isn't heavy as a rock – at only 69 g, LIX Plus Onyx White is a true lightweight champion.

Tough but sensitive

Who doesn't like movie characters who are tough, but upon closer "inspection" turn out to be sweet and sensitive? The LIX Plus Onyx White Wireless is just like that – while it won't sing you a serenade in the rain, we paired its sweet and innocent looks with a killer set of top-notch components.

At the very core of The LIX Plus Onyx White's insane performance lies the [battle-proven](#) PixArt PAW3370 sensor. It's ultra-precise (up to 19 000 DPI) and ensures that the cursor position remains constant even when reaching the edge of the pad forces you to lift the mouse for a moment (LOD between 1mm and 2mm). Imagine what performance you can have!

69 g of epic

The LIX Plus Onyx White Wireless looks like a cute little cupcake (especially when backlit colorfully), but weighs a lot less – only [69 g](#). And thanks to its quick PTFE feet, it can easily outpace any competition.

The breathable, "honeycomb" shell of the mouse keeps it slender, but it has other benefits too. It ensures proper air circulation, guaranteeing your hand remains sweat-free even in the heat of the moment. Additionally, the LIX Plus Onyx White Wireless is equipped with slick PTFE feet to make sure it'll slide across any mousepad effortlessly.

Fast, faster, Kailh GM 8.0

The LIX Plus Onyx White Wireless is like a sprinter, if sprinters ran ultramarathons. Its resilience knows no limits, and thanks to extremely durable

Kailh GM 8.0 microswitches you can spend the entire night every night trying to take over the world.

The Kailh GM 8.0 are mechanical microswitches that have found many fans around the globe. They're quick to act [and long-lasting](#) – their lifespan estimated at 80 m clicks means you can click to your heart's delight. If you're in the market for reliable microswitches that'll last years, then place your bets on the Kailh GM.

Unleash the kraken [mouse](#)!

The early bounds of your desk no longer apply – take it where your conquest takes you (including the couch). The convenience of the LIX Plus Onyx White Wireless is hard to overstate. Do whatever you want wherever you want, and do it with style!

PSA: You might instantly develop an allergy to cables. Consider yourself warned.

2.4 GHz wireless connectivity ensures a stable connection with 100% precision and 0 delays, giving you the edge in any duel. Just sit down and do your thing, wherever. All you need to do is to plug the adapter (conveniently hidden in a magnetic compartment on the bottom) into your computer and voilà.

Shining, shimmering, splendid

Let's face it – the LIX Plus Onyx White Wireless looks epic. Make it truly unique by customizing the ARGB backlight to match the colors of your war room.

With the LIX Plus Onyx White Wireless you can backlight the ENDORFY logo, the scroll wheel, and even the strip around the back of the case. Pick your own color or use one of the predefined effects – you can also quickly change the configuration using the dedicated software.

Quick winning, quick charging

LIX Plus Onyx White Wireless doesn't tire easily. Outfitted with a heavy-duty battery and an extremely power-efficient sensor to prolong its wireless adventures, it doesn't require your constant attention.

So you can focus on the game instead of worrying about the battery level.

When the power level drops to dangerous levels (below 25%), the scroll wheel starts flashing red. It's a sign that a quick charging session is in order. But don't worry, you can just plug in the USB-C cable and continue gaming without interruptions.

Trust ~~your guts~~ [LIX's software](#)

With LIX Plus Onyx White Wireless in your hand, you ~~live~~ [click](#) as you like. Thanks to the dedicated software, you have full control over the mouse and all its perks. Make your own rules – change the sensitivity and LOD, customize the ARGB backlight, and record macros.
