

Product name: ENDORFY LIV Plus Wireless

Product code: EY6A016

Named "Best Gaming Mouse" of 2025 by the European Hardware Association, the LIV Plus Wireless is our nod toward gamers and esports players. Every component, from the light construction with a PixArt PAW3395 sensor to the wireless docking station, has been created to increase your endurance during long gaming sessions. Connect to the device of your choice and win it all – effortlessly.

Best Gaming Mouse 2025

Awarded by the European Hardware Association, the prestigious title of "Best Gaming Mouse 2025" is a mark of industry recognition and proof that the LIV Plus Wireless ranks among the elite in PC accessories and gaming peripherals.

No limits

Included with LIV Plus Wireless you'll find a charging dock that allows for comfortable, wireless charging of the mouse. Thanks to anti-slip rubbers (that are easy to clean and reattach) it stays firmly in one place.

Move quickly and swiftly

The ultra-light and perfectly balanced body of LIV Plus Wireless is our in-house design. Its breathable surface provides not only great airflow beneath your hand but also a staggering advantage over your foes in games and esports competitions. To put it simply – your moves will be fast, unimpeded and fully controlled.

Long-lasting performance

An efficient battery and optimized firmware are the heart of LIV Plus Wireless. They let us increase the working time of the mouse to 160 hours on one charge, even with consistent usage.

Top-notch sensor

PAW3395 is a top-of-the-game sensor from PixArt. Its max DPI of 26,000 and tracking speed of 16.51 m/s let you make split-second decisions. Just tweak all the settings to go along with your favorite games and go boldly for the win!

Three connection modes via trimode

LIV Plus Wireless is compatible with almost all devices used for gaming and provides you with a stable, lag-free connection with PCs, consoles, telephones or TVs. Plug it in via a USB cable, connect using Bluetooth or through 2.4 GHz wireless and check which option works best on your battlefield.

Just as you like it

Thanks to dedicated software you can adjust LIV Plus Wireless to your preference. It allows you to create macros and change the sensitivity, LOD or the backlight of various elements.
