

Product name: ENDORFY LIV Wireless Onyx White
Product code: EY6A019

The ultra-lightweight and distinctly precise LIV Wireless Onyx White mouse with ARGB backlight is our gesture towards gamers & all other users who rely on precise mouse movements and need a wireless connection. Everything from the perfectly balanced body to the PixArt PAW3311 sensor provides endurance and precision for the most intensive sessions.

White as the onyx

Inspired by a durable, marble-like material, the looks of LIV Wireless Onyx White impress with its bright-colored body and match all kinds of computer setups.

Fast and precise moves

LIV Wireless Onyx White has a perfectly balanced, ultra-lightweight body (only 69 g) that is a modern in-house design. It gives you a striking advantage over your opponents on the virtual battlefield. Your moves will be fast, precise, and effortless.

Three different connection types

LIV Wireless Onyx White is compatible with almost all devices used for gaming and provides you with a stable, lag-free connection with PCs, consoles, smartphones or TVs. Plug it in via a USB cable, connect using Bluetooth or through 2.4 GHz wireless and check which option works best on your battlefield. A durable battery and optimized firmware let you forget the charging downtime for long.

Keep pace!

The self-adhesive grip tape grants you a firmer hold of the mouse, which, together with the PTFE feet (a second set included) provides fluid mouse movement. Thanks to this, LIV Wireless Onyx White works great even when the clicking gets intensive.

Advanced sensor

PAW3311 is a renowned sensor from PixArt. Its maximum DPI of 12,000 and 300 IPS tracking speed allow you to make split-second decisions. Just tweak all the settings to go along with your favorite games and go boldly for the win!

Just as you like it

Thanks to dedicated software you can adjust LIV Wireless Onyx White to your preference. It allows you to create macros and change the sensitivity, or the backlight of various elements.
