

Product name: ENDORFY PBT Keycaps
Product code: EY0E001

The ENDORFY PBT Keycaps are an elegant and durable shield for your keyboard. Each of the 124 buttons you get is made in Double Shot technology – it means that, even after long ~~hours~~ [years](#) of clicking, they will still look brand-new. The smell of freshness is sold separately ;)

Together with PBT keycaps, we give you rubber O-rings that cushion the impact of the keycaps on the base of the keyboard and beautifully dampen the sounds of the ~~battle~~ [clicks](#). Simply place them on the switches and you're ready to go – have fun without worrying that you'll wake up your roommates (again).

For those who like the classics

PBT keycaps are a classic design that never goes out of fashion – love at first sight [click](#). The deep black with a matte finish and a distinctive font simply look great together and give your keyboard an elegant look.

Double ~~shield~~ [cover](#) of PBT

Our PBT keycaps are an unbreakable team – literally, because each of the 124 buttons looks brand-new even after years of clicking.

It's thanks to the durable PBT material and the use of Double Shot technology in their production. During this process, two variants of durable and abrasion-resistant polymer are injected into the mold, so our buttons do not require an additional paint finish. This is a real [shield](#) that protects against abrasion and scratches, while simultaneously keeping your fingers in place.

Quiet, quieter, [O-ring](#)

Mechanical keyboards can be loud – that's no secret. Their distinctive sound has many fans (including us), but we understand that after a few hours of clicking it can hurt one's ears a little. Especially the ears of other household members.

That's why, together with PBT keycaps, we give you rubber o-rings that cushion the impact of the keycaps on the base of the keyboard and beautifully dampen the sounds of the ~~battle~~ [clicks](#). Simply place them on the switches and you're ready to go – have fun without worrying that you'll wake up your roommates (again).

Assembly in a minute

Assembling PBT keycaps takes literally a moment. We've included ~~advanced tools~~ a [key puller](#) – a small tool that allows you to remove old keycaps in a single motion. We just know that you have more important things on your mind than wrestling with the keys ;)

ENDORFY PBT Keycaps – main features:

- Double Injection Technology
- Broad keyboard compatibility
- Silencing rubber O-rings included

ENDORFY PBT Keycaps – technical specifications:

- Product code: EY0E001

- EAN: 5903018664514
