

Product name: ENDORFY Viro Onyx White
Product code: EY1A004

The ENDORFY Viro Onyx White is a work of art that you can proudly wear even outside of your room. With these headphones, you'll feel like you are in a music video, even if you're only doing groceries. The massive drivers ensure the highest quality of sound (and the music video is in your head).

We also give you a [detachable](#) microphone with a pop filter. It's useful for chit-chats and perfectly dampens unwanted background noise – your BFFs may think you built yourself a recording studio.

Along with the headphones you'll get an extra pair of ~~pillow~~ [earpads](#). We made them from a soft and breathable fabric — to keep your ears cool as a cucumber in the summer. And the looks are killer too, so you won't want to leave them at the house.

Compliments, likes and Onyx White

The Viro Onyx White is a member of the unique Onyx White family. Its name refers to white onyx, a precious mineral famous among connoisseurs for its high strength and extraordinary beauty.

By the way, all the products of the Onyx White series are top-notch attention magnets. Complete the whole set and enjoy the compliments and likes rolling in.

Pst, do you hear it?

With Viro Onyx White you won't ask anyone to repeat themselves. And when you put on your favorite song... then it's just you and your music. You'll even hear the backing vocals that have eluded you until now.

It's all thanks to the massive 53 mm drivers, which we've embedded in [deep](#) earpads made of memory foam. Their closed design limits the audio leakage to the outside while ensuring that no background noise reaches you. It's just you and your music.

1, 2, 3 ([detachable](#)) microphone test

Headphones with a microphone are great. With the Viro Onyx White, you get a [detachable](#) mic with a pop filter. It's small, but it'll win you over with its quality in meetings, video calls, and games. You deserve to sound like a professional.

If you like to listen to music or podcasts on your way to the office, you probably don't want to poke anyone's eye out with an unruly microphone sticking out. We've got you covered — unplug it and voilà, you're all ears.

And then ~~he~~ [Viro](#) enters – all in white

Great parameters aside, the Viro Onyx White is simply cute – the minimalist design and bright color scheme making it impossible to ignore.

With the [soft](#) memory foam earpads, your ears will be on cloud nine — snug like a bug in a rug. But don't sweat it, we also included a pair of summer-friendly fabric earpads, so you'll stay cool-headed even in the heat of the moment.

And because they're comfy as hell, you won't even feel how fast time flies. Well, until someone breaks your trance with a loud: "Hey, cool headphones!".
