

Product name: ENDORFY Stratus 120 PWM ARGB
Product code: EY4A008

Know the feeling of entering an air-conditioned room after a long walk in the blazing sun? That's how your CPU feels when our [illuminated](#) ENDORFY Stratus 120 PWM ARGB zips about in it. It's a small (only 12 cm) fan that could compete in the silent equipment championships – no wonder, as we created it in cooperation with Synergy Cooling.

The ENDORFY Stratus 120 PWM ARGB has an optional ~~God~~ [semi-passive](#) mode and works perfectly in any conditions. Literally – we need a break long before our fans do.

Silence ~~on-set~~ in your PC

The Stratus 120 PWM ARGB is so quiet that you may forget it's even there. We're dead serious – with this bad boy ~~on-board~~ [inside the PC](#), you can render 3D graphics for hours on end without any monotonous noise in the background. Just you and undisturbed silence.

The fan moves on a robust FDB bearing – the main reason why the Stratus 120 PWM works quietly and smoothly even when you squeeze the last juices out of your PC. Additional optimization of the rotor geometry allows efficient operation even in demanding conditions (for example, in cases with dense dust filters).

Red light, green light!

Do you remember the game of red light, green light? The Stratus 120 PWM ARGB works on similar principles – the only difference is that it stops at a low level of the control signal (the so-called optional semi-passive mode). Something tells us you'll really like that... Especially if you're a fan ([wink wink](#)) of silence.

Colors of the wind

If you like colorful things that look fabulous, you'll like the Stratus 120 PWM ARGB fan. The ARGB backlight is a cool option when you like to play with the style of your setup or want to change the décor of the room quickly. Or both – why limit yourself, right?

With [ARGB](#), you can change the look of the fan with just a click or two. The backlight is compatible with popular motherboards and ARGB controllers (including ENDORFY products), so you can easily control it on your Stratus. The fan with ARGB works as well as its non-ARGB brother. They have the same design because we don't compromise on performance for a cool look.

One moment ([for assembly](#)), please

You'll mount the Stratus 120 PWM ARGB in mere minutes – even if it's your first time. We've prepared ~~guarantees~~ [instructions](#) that'll guide you step by step through the entire process. You don't even have to buy any extra mounting parts.

Simply speaking, we took care of everything.

[5-year](#) warranty

The Stratus 120 PWM ARGB proudly wears the ENDORFY logo, and this is enough to make us sure of its quality. That's why we give you a long [5-year](#) warranty (although you probably won't use it anyway).

ENDORFY Stratus 120 PWM ARGB – main features:

- Bright ARGB illumination
- Optional automatic fan stop
- Long-life FDB bearing
- High performance against flow restrictions

ENDORFY Stratus 120 PWM ARGB – technical specifications:

- Product code: EY4A008
- EAN: 5903018666013
- Product type: PC fan
- Fan dimensions: 120×120×25 mm
- Fan bearing: FDB
- Fan speed: 200 (±100) – 1400 (±10%) RPM
- Control (speed): PWM
- Connector (fan): 4-pin (male and female)
- Voltage (fan): 12 V
- Current (fan, peak): 0.25 A
- Control (LED): ARGB
- Connector (LED): 3-pin (male and female)
- Voltage (LED): 5 V
- Current (LED, peak): 0.30 A
- MTBF: 80 000 h
- Warranty: 60 months

ENDORFY Stratus 120 PWM ARGB – logistics data:

- Retail box dimensions: 145×30×130 mm
- Weight (net): 129 g
- Weight (gross): 160 g
- Master carton dimensions: 455×330×285 mm
- Master carton weight (gross): 10.2 kg
- Product quantity in master carton: 60 pcs

Set includes:

- Stratus 120 PWM ARGB fan
- 4× screw
- Safety instructions
