

Product name: ENDORFY Thock TKL Red
Product code: EY5A003

The ENDORFY Thock TKL Red is a small mechanical keyboard of the “tournament” type that, in our humble opinion, should be an honorary guest of every esports event.

Its reinforced chassis fits 87 ultra-fast Kailh Red switches — a perfect match with FPS and multiplayer games. Each key is ~~covered~~ crowned with a durable PBT keycap, manufactured with Double Shot technology to give you that extra edge against your opponents. Say goodbye to fingers slipping off keys in the crucial moments of a game!

Big ace up a small sleeve

The ENDORFY Thock TKL Red is almost pocket-sized, but it’s a big ace up your gaming sleeve.

Being just over 42 cm wide, it allows you to really go to town with the mouse movements. Maximize the use of your desk space and watch your K/D ratio!

For that, we ditched the numpad entirely. The Thock TKL Red is small, but it’s here to win. No dilly-dallying.

Kailh Red switches

We play a lot too, so we know that to reach your true gaming potential you need reliable equipment.

This is where Kailh [Red](#) switches come into play (no pun intended) – all 87 of them.

Kailh Red are what we call “linear” switches – smooth all the way down, they excel where an immediate reaction is a must. Just a [light](#) flick of the key and you disappear from your enemy’s sights. They’re also durable, with an estimated lifespan of as many as 50 m clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

And as a bonus, the keyboard is quite... quiet. We’re sure it’ll find many fans among night owls (and their grateful roommates).

Shield made of PBT

Unstoppable. Undefeated. Unscratched. The Thock TKL Red doesn’t need a retirement plan.

It’ll be your support through thick and thin, come rain or shine. It’ll survive even the hardest hits and the saltiest ragequits — we may or may not have tested it ourselves.

It’s all thanks to the heavy-duty [PBT keycaps](#) and Double Shot technology that the keyboard boasts such high durability. During the manufacturing process, two separate layers of rigid and abrasion-resistant polymer are injected into the mold. The bottom line: our keys don’t require additional surface finish (unlike painted keycaps) — PBT is like armor that also keeps your fingers in place.

Rock Thock solid

The Thock TKL Red is a tough cookie – its “icing” is rock solid, so you don’t have to worry about that upcoming esports tournament on the other side of the globe.

Some even claim that it could withstand a zombie invasion, but we’d rather not test that just yet.

Its chassis reinforced with an aluminium top is rigid and damage-resistant – ready to withstand the toughest conditions. It firmly holds the desk, so it doesn’t move around even when you’re gaming or working for hours on end. It looks the part too – engraved patterns on the bottom and the [ARGB](#) backlight give it a fierce edge.

My name is RGB. [ARGB](#)

Let’s face it – keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then [ARGB](#) is a must-have.

Customize the look of the Thock TKL Red to complete the battle station of your dreams. Highlight each of the 87 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard – without installing anything.

Perhaps some will say it’s unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the [ARGB](#) backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the Thock TKL Red with two-step [adjustable](#) feet. With them, you can place the keyboard at an angle that best suits your needs.

Cable management made easier

The Thock TKL Red keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It’s possible thanks to a [detachable](#) cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently — for example, closer to the grommets or at the edge of the table.

Everything [Keyboard](#) under control

Do you like to have everything [keyboard](#) under control? We thought of that — and equipped the Thock TKL Red with functional and feature-packed software.

We fondly refer to it as “God mode”. With its help, you’ll adjust all keyboard settings to your needs — whether it’s changing the [ARGB](#) backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock TKL Red – main features:

- TKL mechanical keyboard
- Modern design
- Configurable RGB backlighting
- High durability
- Kailh Red mechanical switches
- Durable PBT keycaps
- Detachable cable
- Two-step feet
- N-Key Rollover function
- Functional software

ENDORFY Thock TKL Red – technical specifications:

- Product code: EY5A003
- EAN: 5903018665665
- Product type: Keyboard
- Type of keyboard: mechanical
- Color: black
- Dimensions (L×W×H): 361.5×140×42.5 mm
- Number of keys: 87
- Switch type: Kailh Red
- Switch color: red
- Hot-swap: no
- Keycap material: PBT
- Keycap manufacturing technology: double shot
- Keycap color: black
- Backlight type: RGB
- Connectivity:
 - Gold-plated USB, cable length: 1.8 m
- Keyboard specific features:
 - N-Key Rollover: full
 - Anti-ghosting: full
 - Programmable macros: yes
- Compatibility:
 - Windows
 - macOS
 - Linux
- Software: yes
- Software compatibility: Windows 10
- Warranty: 24 months

ENDORFY Thock TKL Red – logistics data:

- Retail box dimensions: 400×189×49 mm
- Weight (net): 0.88 kg
- Weight (gross): 1.21 kg
- Master carton dimensions: 420×270×400 mm
- Master carton weight (gross): 12.6 kg
- Product quantity in master carton: 10 pcs

Set includes:

- 1× ENDORFY Thock TKL Red keyboard
- 1× Detachable USB-C cable

- 1× Keycap removal tool
- 1× User and safety manual
