

Product name: ENDORFY Omnis Red
Product code: EY5A030

The ENDORFY Omnis is there for you in every situation – whether it's everyday work, having fun, or chatting. And it does it all so well that you'll feel sorry for your friends and their keyboards.

We boosted its [reinforced](#) chassis with the addition of a magnetic wrist rest. This takes the comfort of work to another level and proves useful when you move your keyboard too close to the edge of the desk in the heat of the battle. Additionally, we included a volume wheel and 104 keys with an ARGB backlight. The cherry on top: Kailh Red mechanical switches – the best choice for a quick match after work. We also covered every switch with sturdy PBT keycaps, so you can rest assured they'll look brand new even after months of clicking.

Not only for gamers

We often heard that Omnis Red is a keyboard for gamers. But frankly – it ain't afraid of no tasks, be it in the home office, your personal recording studio or simply hosting an online get-together with friends.

It's all thanks to its comfortable size and the numpad – a true lifesaver when the boss needs "a couple of spreadsheets" done ASAP. It comes in handy after work too, to make custom macros in games or manage your stream.

The Omnis Red is a full-sized mechanical keyboard with an aluminum top. We designed it to flawlessly support you in every task – without warping or getting scratched. Additionally, it stays firmly put on the desk and doesn't slide around even during intensive "work".

And it looks good too – the distinctive shape and ARGB backlight give it a fierce edge.

Kailh [Red](#) switches

You asked for "good switches for gaming" and we instantly answered – Kailh [Red](#)! So naturally, we equipped the Omnis Red with them.

Kailh Red are what we call "linear" switches – smooth all the way down, they excel where an immediate reaction is a must. Just a light flick of the key and you disappear from your enemy's sights. They're also durable, with an estimated lifespan of as many as 50 m clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

And as a bonus, the keyboard is quite... quiet. We're sure it'll find many fans among night owls (and their grateful roommates).

Shield made of PBT

You're in the market for a keyboard that'll last [years](#)? The Omnis Red is a safe bet. It'll survive even intense ragequits – we may or may not have tested it ourselves.

It's thanks to the heavy-duty PBT keycaps and Double Shot technology that the keyboard boasts such high durability. During the manufacturing process, two

separate layers of rigid and abrasion-resistant polymer are injected into the mold. The bottom line: our keys don't require additional surface finish (unlike painted keycaps) – PBT is like armor that also keeps your fingers in place.

Click to your heart's delight

If after a few hours of hardcore clicking your wrists are begging for mercy – we're not even surprised. Especially if you happen to place your keyboard a little too close to the edge of the desk and your hands play the hangman somewhere above your knees. But we've got you – Omnis Red comes with a [convenient](#) wrist rest that'll allow you to click to your heart's delight.

Equipped with magnets, the wrist rest is easy to install and holds the keyboard tight. If you prefer, you can even place it at a distance from your Omnis – thanks to the wide rubber feet, it remains stable in any position.

The devil is in the details [volume](#)

There's no room for "happy accidents" when it comes to gear. So obviously with Omnis Red, we've thought everything through to the last detail (and key).

The result? We give you hardware packed to the brim with convenience and functionality. For example, it only takes a [single](#) movement to adjust the volume on your PC – mute that chatterbox on the call, check the quality of your recording, or grind the whole night without waking up your roomies.

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

My name is RGB. ARGB

Let's face it – keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your ~~friends~~ [followers](#), then ARGB is a must-have.

Customize the look of the Omnis Red to complete the battle station of your dreams. Highlight each of the 104 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard – without installing anything.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the ARGB backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the Omnis Red with two-step adjustable feet. With them, you can place the keyboard at an angle that best suits your needs.

Cable management made easier

The Omnis Red keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a detachable cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

Everything under control

Do you like to have [everything](#) under control? We thought of that – and equipped the Omnis Red with functional and feature-packed software.

We fondly refer to it as “God mode”. With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Omnis Red – main features:

- Full-size mechanical keyboard with a numeric block
- Modern design
- Configurable ARGB backlighting
- High durability
- Palm rest with magnetic fastening
- Metal volume wheel
- Kailh Red mechanical switches
- Durable PBT keycaps
- Detachable cable
- Two-step feet
- N-Key Rollover function
- Functional software

ENDORFY Omnis Red – technical specifications:

- Product code: EY5A030
- EAN: 5903018665115
- Product type: keyboard
- Type of keyboard: mechanical
- Color: black
- Dimensions: 453×210×45 mm (L×W×H)
- Number of keys: 104
- Switch type: Kailh Red
- Switch color: red
- Hot-swap: no
- Keycap material: PBT
- Keycap manufacturing technology: double shot
- Keycap color: black
- Backlight type: RGB
- Connectivity:
 - Gold-plated USB, cable length: 1.8 m
- Keyboard specific features:
 - N-Key Rollover: full
 - Anti-ghosting: full
 - Programmable macros: yes
 - Palm rest: yes
- Compatibility:

- Windows
 - macOS
 - Linux
- Software: yes
- Software compatibility: Windows 10
- Warranty: 24 months

ENDORFY Omnis Red – logistics data:

- Retail box dimensions: 500×190×70 mm
- Weight (net): 1.15 kg
- Weight (gross): 1.62 kg
- Master carton dimensions: 515×375×400 mm
- Master carton weight (gross): kg
- Product quantity in master carton: 10 pcs

Set includes:

- 1× ENDORFY Omnis Red keyboard
- 1× Detachable USB-C cable
- 1× Keycap removal tool
- 1× Safety instruction
