

**Product name: ENDORFY Omnis Pudding Brown**  
**Product code: EY5A032**

Go big or go home – for the ENDORFY Omnis Pudding Brown it doesn't matter if you're working or playing. It has everything you need for both and more, including looks. Check out those [cute](#) keys!

Its design is minimalist, but look at the list of features – ~~comfy pillow~~ [wrist rest](#)? Check. Volume wheel? Check. ARGB? Check. A full set of 104 keys? Check! And beneath each key lies a mechanical Kailh Brown Switch. These highly responsive switches give you gentle feedback when activated, so you can be sure that the key pressed equals an action performed, simple as that.

### **A jack-of-all-trades**

The Omnis Pudding Brown is a natural at the office and outside of it. Its [convenient](#) size and numpad will help you get things done – whether it's tackling those pesky Excel sheets, min-maxing your MMO gear, or just catching up with friends.

The Omnis Pudding Blue is a full-sized mechanical keyboard with an aluminum top. We designed it to flawlessly support you in every task – without warping or getting scratched. Additionally, it stays firmly put on the desk and doesn't slide around even during [intensive](#) "work".

And it looks good too – the distinctive shape and ARGB backlight give it a fierce edge.

### **Insane Puddings**

You want to know what makes our keyboard shine so vividly? That's easy: the insane Pudding keycaps. These bad boys are [\(in\)](#) the limelight wherever they go.

We designed them to be easy to play with. At any given second you're just a click or two away from completely changing each key's look – give them a rainbow treatment, a monochrome makeover, or highlight individual keys. If you want, you can also turn off ARGB lighting completely – Puddings slay either way.

It's all thanks to the special technique we used to bring these two-colored keycaps to life – Double Shot. During that process, two separate layers of heavy-duty PBT polymer are injected into the mold. The rigid top keeps the keycaps from wearing out and the milky white bottom (where the name comes from) shines with bright ARGB light.

### **Brown is the answer**

Who'd want to have a separate keyboard for work and another one for gaming? That sounds like a hassle we can do without. Luckily, there's an easy answer – Kailh [Brown](#). Perfectly balanced, as all things should be.

Kailh Brown are tactile switches, made for situations that require smooth and subtle movements. They're also durable, with an estimated lifespan of as many as 50 [m](#) clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

And as a bonus, the keyboard is quite... quiet. We're sure it'll find many fans among night owls (and their grateful roommates).

### **Live [Click](#) as you like**

Not everything in life lines up perfectly. The same goes for work and gaming – sometimes you find yourself at the edge of the desk, with the keyboard hanging on for its dear life... and your wrists without any support whatsoever, screaming for mercy.

That's when the included wrist rest comes to the rescue. Stabilize your hands and click away to your heart's delight!

Equipped with magnets, the wrist rest is easy to install and holds the keyboard tight. If you prefer, you can even place it at a distance from your Omnis – thanks to the wide rubber feet, it remains stable in any position.

### **Master of sounds**

It's all up to you – what and when are you going to play, and even how loud. But now it just got a whole load easier to master. Omnis Pudding Brown gives you the power to control the sound with the single flick of a finger. Without alt-tabbing.

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound [without](#) taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

### **My name is RGB. ARGB**

Let's face it – keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then ARGB is a must-have.

Customize the look of the Omnis Pudding Brown to complete the battle station of your dreams. Highlight each of the 104 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard – without installing anything.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the ARGB backlighting is the thing for you.

### **Adjustable angles**

To make clicking even more comfortable, we equipped the Omnis Pudding Brown with two-step adjustable feet. With them, you can place the keyboard at an angle that best suits your needs.

### **Mess [Cable](#) management made easier**

The Omnis Pudding Brown keyboard chassis allows you to route the cable in [three](#) different ways, helping you make better use of your desk space.

It's possible thanks to a detachable cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

### **Everything under control**

Do you like to have [everything](#) under control? We thought of that – and equipped the Omnis Pudding Brown with functional and feature-packed software.

We fondly refer to it as “God mode”. With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

### **ENDORFY Omnis Pudding Brown – main features:**

- Full-size mechanical keyboard with a numeric block
- Modern design
- Configurable RGB backlighting
- High durability
- Palm rest with magnetic fastening
- Metal volume wheel
