

Product name: ENDORFY Omnis Pudding Onyx White Red
Product code: EY5A036

The ENDORFY Omnis Pudding Onyx White Red is one of those keyboards with the power to change your whole life. It looks great on your desk, feels great under your fingers, and scores great across the board – no matter if it's a game, a creative challenge, or an office task. One day we'll patch in a coffee brewing module, and it'll be as everyone's favorite magnetic villain said, "Perfection".

It's all state-of-the-art, competitive to the bone. A [reinforced](#) chassis with a magnetic wrist rest, a volume wheel, 104 Pudding PBT keycaps illuminated with ARGB backlighting... It already sounds like the stuff dreams are made of, and we haven't even mentioned the ultra-fast Kailh Red mechanical switches yet. You can probably tell why we like it so much, right?

Of house Onyx White

The Omnis Pudding Onyx White Red is a keyboard from the dazzling Onyx White series. One glance is enough to tell that behind the elegant chassis and the splendid aura of its Pudding keys lies something equally special.

This bright centerpiece on your desk was inspired by the white variety of onyx – a precious mineral, known for its high durability and unique beauty. Whenever you feel like changing things up a bit at your home office, you can activate the ARGB backlight with a single click. The [aluminum](#) chassis reflects its glow beautifully, making it appear almost... incandescent.

Full-sized fun keyboard

Why settle for less when you can have more? More entertainment and more of your keyboard – say "Hello!" to the Omnis Pudding Onyx White Red. Numpad included!

If you ever spent a joyful afternoon in Excel or needed custom macros in your life, you won't say "No" to an entire set of [extra](#) keys at your disposal. Additionally, this keyboard stays firmly put on the desk and doesn't slide around, even during intense "work". So don't worry, your final raid of the day is safe with the Omnis Pudding Onyx White Red.

The Omnis Pudding Onyx White Red is a full-sized mechanical keyboard with an aluminum top. We designed it to flawlessly support you in every task – without warping or getting scratched. Additionally, it stays firmly put on the desk and doesn't slide around even during intensive work.

And it looks good too – the distinctive shape and ARGB backlight giving it a fierce edge.

104 Puddings – lit

Play with your image, express yourself, and change the look depending on your mood – the Omnis Pudding Onyx White Red will be there with you every step of the way. It's like a chameleon on speed, matching your clothes one minute and wearing the colors of your guild the next... What comes after? Only you can tell.

It's all thanks to the special technique we used to bring these two-colored keycaps to life – [Double Shot](#). During that process, two separate layers of heavy-duty PBT polymer are injected into the mold. The rigid top keeps the keycaps from wearing out and the milky white bottom (where the name comes from) shines with bright ARGB light.

No time to waste

When life requires you to react quickly, Kailh Red mechanical switches come to the rescue.

With that ultra-face ace up your sleeve, you can fire off a macro in a flash, outplay an opponent, or fast-track an article for your blog. Some people claim it's possible to do it all at once, but we won't confirm nor deny that.

Kailh Red are what we call "linear" switches – smooth all the way down, they excel where an immediate reaction is a must. Just a light flick of the key and you disappear from your enemy's sights.

And as a bonus, the keyboard is quite... quiet. We're sure it'll find many fans among night owls (and their grateful roommates).

Everything [Keyboard](#) the way you want

We don't make the rules. We know that sometimes in the heat of the battle you like to turn your keyboard sideways or move it to the edge of the desk. But don't leave your wrists hanging! Here, have some help – a wrist rest that'll keep you in a comfortable position, allowing you to have more fun.

Simply put – ~~everything~~ [keyboard](#) is just the way you want it to be.

Equipped with magnets, the wrist rest is easy to install and holds the keyboard tight. If you prefer, you can even place it at a distance from your Omnis – thanks to the wide rubber feet, it remains stable in any position.

Just keep rolling

With the Omnis Pudding Onyx White Red, you can quickly fine-tune the volume on your computer. No alt-tabbing or glancing away from your monitor. To paraphrase our favorite fish movie star – just keep rolling, just keep rolling...

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

My name is RGB. ARGB

Let's face it – keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then ARGB is a must-have.

Customize the look of the Omnis Pudding Onyx White Red to complete the battle station of your dreams. Highlight each of the 104 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the

keyboard – without installing anything.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the ARGB backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the Omnis Pudding Onyx White Red with two-step adjustable feet. With them, you can place the keyboard at an angle that best suits your needs.

Cable management made easier

The Omnis Pudding Onyx White Red keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a detachable cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

Everything under control

Do you like to have everything under control? We thought of that – and the equipped Omnis Pudding Onyx White Red with functional and feature-packed software.

We fondly refer to it as "God mode". With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Omnis Pudding Onyx White Red – main features:

- Full-size mechanical keyboard with a numeric block
- Sleek shape and stylish white design
- Configurable ARGB backlighting
- High durability
- Palm rest with magnetic fastening
- Metal volume wheel
