

Product name: ENDORFY Thock Compact Wireless Black
Product code: EY5A069

The ENDORFY Thock Compact Wireless Black is a teeny-tiny keyboard with massive potential. On its rigid chassis, awaiting your commands, stand 61 battle-ready ~~warriors~~ [buttons](#) armed with PBT keycaps. We used Double Shot technology, so you can grind harder than you grind your coffee beans in the morning.

And their click, wow, what a flawless click that is – thanks to the Kailh Box Black switches mounted underneath. If you prefer keys that require a bit more pressure to activate, you'll love these. In comparison to the standard Kailh Black, they also have a beefed-up stem, making them virtually [indestructible](#) (70 m clicks).

And the cherry on top – hot-swap for the ultimate pro experience. Our keyboard is compatible with both 3- and 5-pin switches.

Small, but packs a punch

The Thock Compact Wireless Black is like a featherweight boxing champion. Sure, it's fairly small, but you don't want to challenge it to [a fight](#).

It's one-size-fits-all, so it suits even the most crowded desks. Its design allows you to place the cable in one of three custom-made channels on the bottom. Route it closer to the grommets or at the edge of the table for easier cable management.

Multiple connections available

It's a three-lane highway with the Thock Compact Wireless Black, so you can ~~rule the world~~ [work](#) on several devices without the hassle of untangling the cables. Make better use of your home office – sit back on a comfortable couch instead of being permanently desk-bound.

Pair your PC, tablet, or smartphone via lag-free Bluetooth or 2.4 GHz connections. For a more old-school vibe, use the included USB-C cable.

Hot-swap and ~~Men~~ [Switches](#) In Black

Thock Compact Wireless Black is an instant cult classic, with its Kailh Box special ~~agents~~ [switches](#) at your disposal. It only takes one decisive click to drop out of the video call or disappear from your enemy's sights.

Now that we think about it – there's little to no difference between the two scenarios...

The Kailh Box Black are wickedly comfortable "linear" switches, they're as smooth as a hot knife through butter. In comparison to the standard Kailh Black, they have an additionally reinforced stem structure. With gear like this, they're an elite commando unit ready for a mission – tireless and [ultra-durable](#). 70 m clicks are no joke.

The Thock Compact Wireless Black also has a truly PRO option for tech geeks – hot-swap, which is the ability to easily swap switches in and out. The keyboard is

compatible with both 3- and 5-pin switches, so you can take your pick from a wide range of models available on the market.

Double Shot, double shield

PBT is one of the best ways to protect your keycaps. You can smack them like an angry trash panda, and they won't even blink. No scratches, no rubbed-off letters, no shiny spots – ARGB is the one that shines.

We're dead serious. We tested it over countless hours of typing, gaming, editing, grinding, spreadsheeting, raiding, and pushing emails. And we saw that the PBT was good, so we ~~armored~~ [covered](#) our keycaps with it. Twice over.

It's thanks to the heavy-duty PBT keycaps and Double Shot technology that the keyboard boasts such high durability. During the manufacturing process, two separate layers of rigid and abrasion-resistant polymer are injected into the mold. The bottom line: our keys don't require additional surface finish (unlike painted keycaps) – PBT is like armor that also keeps your fingers in place.

Tough cookie (for tough guys)

The Thock Compact Wireless Black might look a bit like a newbie's EQ at the lowest level – but don't let its unassuming looks deceive you. You can walk 500 miles with it (in your backpack) and play through a marathon of FPS matches without breaking a sweat.

Its reinforced chassis gives it a defense bonus, so it's super rigid and resistant to damage. Additionally, it stays firmly put on the desk and doesn't slide around like a madman during even the most intense "work".

Let there be ~~light~~ ARGB

Keyboards without backlights are fiine... but if you want to really stand out from the crowd, then ARGB is the way to go. With just a single click, you can make your setup look like a proper spaceship (or a unicorn's dream, no judgment here).

With the Thock Compact Wireless Black, you can easily customize the look of the keyboard to match the rest of your ~~battle station~~ [desk](#). Highlight each of the 61 keys separately, change the color of the core hotkeys, or set a single effect across the board. You can use the included software or do it directly from the keyboard – without installing anything.

Adjustable angles

For your uncompromised convenience, the Thock Compact Wireless Black is equipped with [magnetic](#) feet. Pick the height that best suits your needs.

Activate the God mode

Like to have [absolute](#) freedom and full control? We do too – so we added functional and feature-packed software to the Thock Compact Wireless Black. Do it your way.

We fondly refer to it as "God mode". With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even

create your own macros.

ENDORFY Thock Compact Wireless Black – main features:

- Compact mechanical keyboard
- Wireless modes
- Detachable cable
- Programmable RGB backlighting
- Hot-swappable switch sockets
- Kailh Black mechanical switches
- Durable PBT keycaps
- Dual-function keys
- Two-step feet
- Functional

software
