

**Product name: ENDORFY Thock 75% Wireless Black**  
**Product code: EY5A074**

ENDORFY Thock 75% Wireless Black is a small keyboard with Kailh Box Black switches (with lifespan of 70 m clicks). Together with the durable PBT keycaps manufactured in Double Shot technology, they allow for countless hours of good while still looking brand-new even after months of ~~work~~ [fun](#).

The keyboard is small but feisty. It saves your desk space, allowing unrestricted mouse movements and giving you room for additional gadgets. The reinforced aluminum top means you don't need to walk on eggshells around it.

And if you ever feel like ~~spicing~~ [switching](#) things up a bit, the ENDORFY Thock 75% Wireless Black sports a hot-swap too — giving you the possibility to easily change switches. The keyboard supports all 3- and 5-pin models, giving you full freedom of choice.

### **[Always](#) ready for action**

If you like minimalist design and tidy space, then you'll love the Thock 75% Wireless Black. This no-nonsense keyboard is small, durable, and [always](#) ready for action.

The keyboard is compact, so it fits even small desks. For additional convenience, we designed it to allow you to choose the routing of the cable through special channels on the bottom. Place it closer to the grommets or the edge of the table, whatever suits you best. Cable management made easy.

### **Three ways**

It's good to have options. And we give you three in terms of connectivity. Wired peripherals generally are ok, but nothing beats relaxing on a couch while maintaining perfect control of ~~the world~~ [your PC](#).

Pair your PC, tablet, or smartphone via lag-free Bluetooth or 2.4 GHz connections. For a more old-school vibe, use the included [USB-C cable](#).

### **Hot-swap & Kailh Box Black**

The Thock 75% Wireless Black is an instant cult classic, with its Kailh Box special ~~agents~~ [switches](#) at your disposal. It only takes one decisive click to drop out of the video call or disappear from your enemy's sights.

Now that we think about it — there's little to no difference between the two scenarios...

The Kailh Box Black are wickedly comfortable "linear" switches, like Kailh Box Red but requiring a bit more force to activate. In comparison to the standard Kailh Black, they have an additionally reinforced stem structure. With gear like this, they're an elite commando unit ready for a mission — tireless and ultra-durable. [70 m](#) clicks are no joke.

The Thock 75% Wireless Black also has a truly PRO option for tech geeks — hot-swap, which is the ability to easily swap switches in and out. The keyboard is compatible with both 3- and 5-pin switches, so you can take your pick from a

wide range of models available on the market.

### **Double ~~shield~~ Shot**

PBT FTW. We tested the Thock 75% Wireless Black over countless hours of typing, gaming, editing, grinding, spreadsheeting, raiding, and pushing emails. And we saw that the [PBT](#) was good, so we armored our keycaps with it. Twice over.

It's thanks to the heavy-duty PBT keycaps and Double Shot technology that the keyboard boasts such high durability. During the manufacturing process, two separate layers of rigid and abrasion-resistant ~~shield~~ [polymer](#) are injected into the mold. The bottom line: our keys don't require additional surface finish (unlike painted keycaps) — PBT is like armor that also keeps your fingers in place.

### **Immovable object, [unstoppable](#) force**

The Thock 75% Wireless Black is so [durable](#), it could very well be used in self-defense. The sturdy construction doesn't shy away from any challenges — be it a trip around the world or an all-nighter in an FPS.

Its [reinforced](#) chassis gives it a defense bonus, so it's super rigid and resistant to damage. Additionally, it stays firmly put on the desk and doesn't slide around like a madman during even the most intense "work".

### **Side quest: party hard**

There's no better time to party than the present — thanks to the Thock 75% Wireless Black and its volume wheel, you won't need to alt-tab to get the party started. All it takes is a flick of your hand to take it to the next ([louder](#)) level.

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

### **Let there be ~~light~~ [ARGB](#)**

Keyboards without backlights are fiiiine... but if you want to really stand out from the crowd, then [ARGB](#) is the way to go. With just a single click, you can make your setup look like a proper spaceship (or a unicorn's dream, no judgment here).

With Thock 75% Wireless Red, you can easily customize the look of the keyboard to match the rest of your ~~desk~~ [battle station](#). Highlight each of the keys separately, change the color of the core hotkeys or set a single effect across the board. You can use the included software or do it directly from the keyboard — without installing anything.

### **Comfort is king**

For your uncompromised convenience, the Thock 75% Wireless Black is equipped with adjustable feet. Pick the height that best suits your needs.

And if you want additional support, you can equip it with a matching Thock 75% Palm Rest — a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC.

## **Activate the God mode**

Like to have absolute freedom and full control? We do too — so we added functional and feature-packed software to the Thock 75% Wireless Black. Do it your way.

We fondly refer to it as “God mode”. With its help, you’ll adjust [all](#) keyboard settings to your needs — whether it’s changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

## **ENDORFY Thock 75% Wireless Black – main features:**

- Programmable RGB lighting
- Detachable cable
- PBT double-shot keycaps
- Hot-swappable switch sockets
- Volume control knob with mute button
