

Product name: ENDORFY Thock 75% Wireless Red Onyx White Pudding
Product code: EY5A118

The first time you put your hands on the ENDORFY Thock 75% Wireless Red Onyx White Pudding keyboard, you will forget about all others. This wireless bad boy with Pudding keycaps and ARGB backlighting is made for epic quests. We mean it – we've tested it the hard way.

The splendid chassis has a volume knob with mute function, and we've fitted it with hellishly fast Kailh Box Red switches with PBT keycaps. These are the true warriors that fear nothing. Their lifespan is estimated at 70M ~~battles~~ [clicks](#), so you can plan your virtual campaigns with confidence. Even the ones in your office.

We also give you a hot-swap, which is the option to change switches on the fly. The keyboard supports all 3-pin and 5-pin models, so you have plenty of possibilities to choose from.

The ~~House of~~ Onyx White [series](#)

Meet the Thock 75% Wireless Red Onyx White Pudding – a keyboard from our Onyx White ~~family~~ [series](#). This little work of art was designed to spice up the look of your gaming room and collect compliments from your delighted besties. Apparently, some people hang its picture above their beds (but we haven't checked, yet).

This bright centerpiece on your desk was inspired by the white variety of onyx – a precious mineral, known for its high durability and unique beauty. Makes your friends go mad with envy!

1, 2, 3... Connecting

The Thock 75% Wireless Red Onyx White Pudding is the BFF of anyone who likes flexible solutions. This bad boy connects to other equipment in 3 different ways, so you can easily pair it with the device of your choice and click from the couch.

Pair your PC, tablet, or smartphone via Bluetooth or 2.4 GHz connections. For a more old-school vibe, use the included [USB-C](#) cable.

Smaller keyboard, more space

A smaller keyboard = more space. With the Thock 75% Wireless Red Onyx White Pudding on your desk, you get extra space for ~~your treasures~~ [extra accessories](#). Use it wisely!

The keyboard is quite small (only 32.6 cm wide), so it fits on smaller tabletops. For your convenience, we have designed it so you can route the cable in one of three directions. Each allows you to position the cable where it's most convenient – for example, closer to the grommets or the edge of the desk.

Glowing boxes of pudding

What do we like about the Thock 75% Wireless Red Onyx White Pudding keyboard the most? The answer is simple – the illuminated Pudding keys. Our two-toned keycaps look insane and come out of the most hardcore battles

without ~~bruises~~ [a scratch](#).

It's all thanks to the special technique we used to bring these two-colored keycaps to life – Double Shot. During that process, two separate layers of heavy-duty PBT polymer are injected into the mold. The rigid top keeps the keycaps from wearing out and the milky white bottom (where the name comes from) shines with bright ARGB light.

And the cherry on top – you can remove keycaps (switches too) at any time. Together with the keyboard, we give you handy tools for pulling them out.

Kailh [Box Red](#) on board

There's no denying that the Thock 75% Wireless Red Onyx White Pudding looks great. And it gets better on the inside – under each of the keys, we've installed the Kailh Box Red switch. With these hellishly fast switches, your virtual opponents won't stand a chance.

Well, unless they also ~~fight~~ [click](#) with the Reds.

Kailh Box Red are "linear" and always ready to pounce. They excel in situations where you need to react immediately. Compared to the standard Kailh Red, they have an extra reinforced stem structure. With gear like this, they're an elite commando unit ready for a mission – tireless and ultra-durable. 70 m clicks are no joke.

The Thock 75% Wireless Red Onyx White Pudding also has a truly pro option for tech geeks – hot-swap, the ability to easily swap switches in and out. The keyboard is compatible with both 3-pin and 5-pin switches, so you can take your pick from a wide range of models available on the market.

Aluminum ~~shield~~ [top](#)

When you first look at the Thock 75% Wireless Red Onyx White Pudding, the first thing you notice is the extra armor on the chassis. It may seem like just a nice accessory – but the truth is that the aluminum ~~shield~~ [top](#) makes it ready for the most intense battles. And ragequits.

Its reinforced chassis gives it a defense bonus, so it's super rigid and resistant to damage. Additionally, it stays firmly put on the desk and doesn't slide around like a madman during even the most intense "work".

For your convenience, we have equipped the Thock 75% Wireless Red Onyx White Pudding with [adjustable](#) feet. With these bad boys you can set the keyboard in one of three heights – just the way you like it best. And if you want additional support, you can pair it with a matching Thock 75% Palm Rest (available separately) – a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC.

It's party time!

What do you say to the Thock 75% Wireless Red Onyx White Pudding keyboard every Friday night?

It's party time!

With the convenient volume knob, it's just a slide away.

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

ARGB from outer space

Keyboards without backlights are fine... but if you want to really stand out from the crowd, then [ARGB](#) is the way to go. With just a single click, you can make your setup look like a proper spaceship (or a unicorn's dream, no judgment here).

With the Thock 75% Wireless Red Onyx White Pudding, you can easily customize the look of the keyboard to match the rest of your battle station. Highlight each of the keys separately, change the color of the core hotkeys or set a single effect across the board. You can use the included software or do it directly from the keyboard.

Keyboard in the God mode

Like to have absolute freedom and full control? We do too – so we added functional and feature-packed software to the Thock 75% Wireless Red Onyx White Pudding. Do it your way.

We fondly refer to it as God mode. With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.
