

Product name: ENDORFY Thock 75% CZ Red
Product code: EY5C007

Everybody needs a sidekick – you can't ~~save the world~~ [do your things](#) alone. That's why we've got the ENDORFY Thock 75% CZ Red for you. It's a pitch-black, aluminum-reinforced keyboard for playing and creating. It looks great in the office, too.

The keyboard fields an army of super-strong keys with Kailh Red mechanical ~~hearts~~ [switches](#). These are red-hot switches that love to battle virtual opponents. Their lifespan is estimated at 50 million clicks, so you have oh-so-many hours of fun ahead of you. Especially since we encased each switch in a keycap with a Czech layout – such a shield protects against damage better than armor (but is nicer to the touch).

Make way

At first glance, you can see that the Thock 75% CZ Red is smaller than full-size keyboards. This format frees up more space on your desk – for example, for wider mouse maneuvers or additional tech gadgets. Your desk will finally be able to breathe!

The keyboard is short and sweet – just enough to fit on a smaller desk. For additional convenience, we designed it so you can choose the routing of the cable through special channels on the bottom. Place it closer to the grommets or the edge of the table, whatever suits you best. Cable management made easy.

“Click” and you’re on

Winning, creating, working... Every day comes with new quests and new challenges. But don't fret, with the Thock 75% CZ Red keyboard comes backup – ultra-fast Kailh Red switches to instantly execute your every ~~command~~ [click](#). Because we know that there is no time for lags in real life.

Kailh Red are what we call “linear” switches – smooth all the way down, they excel where an immediate reaction is a must. Just a light flick of the key and you disappear from your enemy's sights. They're also durable, with an estimated lifespan of as many as 50 million clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

Keycaps made of ABS

The Thock 75% CZ Red is a mechanical keyboard that lets you ~~tell~~ [write](#) your story – defeat virtual enemies, win races, chat with your friends... Anything you want.

All thanks to durable ABS keycaps. They won't crack (literally!) even in the most intense battles, are very pleasant to the touch and hold your fingers well. Plus, they look beautiful with ARGB backlighting, so you can expect a few jealous looks from your team.

Tough like no one

We'll say immodestly that the Thock 75% CZ Red is the toughest guy in the neighborhood. Seriously – it's resistant to damage like a tank with its armor maxed out. And cheats for immortality. And a full package of protective spells,

just in case.

Its reinforced chassis gives it a defense bonus, so it's super rigid and resistant to damage. Additionally, it stays firmly put on the desk and doesn't slide around like a madman during even the most intense "work".

Hear no evil

Meeting with the team, house party on Friday evening, board game marathon after work... You have a lot of options for others to see [hear](#) you. With the Thock 75% CZ Red, all you need is one move to the volume wheel and you're ready to start the party or mute everyone and everything. You decide.

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

Northern Lights over your desk

We like keyboards without backlighting, but we can't imagine evening* FPS sessions without the beautiful ARGB aurora over the ~~battle station~~ [desk](#). We simply love all the stuff that attracts admiring glances.

*Morning actually, too. And also the afternoon ones.

With the Thock 75% CZ Red, you can easily customize the look of the keyboard to match the rest of your battle station. Highlight each of the keys separately, change the color of the core hotkeys or set a single effect across the board. You can use the included software or do it directly from the keyboard.

Time to ~~stretch~~ [set up](#)

Let's face it – the keyboard also has its needs, and sometimes it needs to stretch its legs too. That's why the Thock 75% CZ Red is equipped with adjustable feet. Pick the height that best suits your needs.

And if you want additional support, you can equip it with a matching Thock 75% (available separately) – a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC. Some people use it as a stand for a coffee mug – but we haven't tested that. Yet.

Several ways to arrange a cord

The Thock 75% CZ Red's chassis allows you to route the cable in one of three directions. Thanks to this, you finally can make better use of space on your desk.

This is thanks to the detachable cable and three channels on the bottom of the keyboard. Each of them allows you to arrange the cable in a comfortable position – for example, closer to the grommets or at the edge of the tabletop.

Activate the God mode

Like to have [absolute](#) freedom and full control? We do too – so we added functional and feature-packed software to the Thock 75% CZ Red. Do it your way.

We fondly refer to it as “God mode”. With its help, you’ll adjust all keyboard settings to your needs – whether it’s changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock 75% CZ Red – main features:

- Programmable ARGB lighting
- Detachable cable
- Durable ABS keycaps
- Volume control knob with mute button

ENDORFY Thock 75% CZ Red – technical specifications:
