

Product name: ENDORFY Thock TKL HU Red
Product code: EY5E004

The ENDORFY Thock TKL HU Red is a small mechanical keyboard of the “tournament” type that, in our humble opinion, should be an honorary guest of every esports event.

Its reinforced chassis fits 87 ultra-fast Kailh Red switches — a perfect match with FPS and multiplayer games. Each key is ~~covered~~ crowned with a keycap with a Hungarian layout to give you that extra edge over your opponents. Say goodbye to fingers slipping off the keys in the crucial moments of the game!

Big ace up a small sleeve

The Endorfy ENDORFY Thock TKL HU Red is almost pocket-sized, but it’s a big ace up your gaming sleeve.

Being just over 36 cm wide, it allows you to really go to town with the mouse movements. Maximize the use of your desk space and watch your K/D ratio!

For that, we ditched the numpad entirely. The ENDORFY Thock TKL HU Red is small, but it’s here to win. No dilly-dallying.

Kailh Red switches

We play a lot too, so we know that to reach your true gaming potential you need reliable equipment.

This is where Kailh [Red](#) switches come into play (no pun intended) – all 87 of them.

Kailh Red are what we call “linear” switches – smooth all the way down, they excel where an immediate reaction is a must. Just a [light](#) flick of the key and you disappear from your enemy’s sights. They’re also durable, with an estimated lifespan of as many as 50 million clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

And as a bonus, the keyboard is quite... quiet. We’re sure it’ll find many fans among night owls (and their grateful roommates).

Keycaps made of ABS

The ENDORFY Thock TKL HU Red is a mechanical keyboard that lets you ~~tell~~ [write](#) your story – defeat virtual enemies, win races, chat with your friends... Anything you want.

All thanks to durable ABS keycaps. They won't crack (literally!) even in the most intense battles, are very pleasant to the touch and hold your fingers well. Plus, they look beautiful with ARGB backlighting, so you can expect a few jealous looks from your team.

Rock [Thock](#) solid

The ENDORFY Thock TKL HU Red is a tough cookie – its “icing” is rock solid, so you don’t have to worry about that upcoming esports tournament on the other side of the globe.

Some even claim that it could withstand a zombie invasion, but we'd rather not test that just yet.

Its chassis reinforced with an aluminium top is rigid and damage-resistant – ready to withstand the toughest conditions. It firmly holds the desk, so it doesn't move around even when you're gaming or working for hours on end. It looks the part too – engraved patterns on the bottom and the [ARGB](#) backlight give it a fierce edge.

My name is RGB. [ARGB](#)

Let's face it – keyboards without a backlight are fine. But if you like the darkness of the night, want to stand out from the crowd, or impress your followers, then [ARGB](#) is a must-have.

Customize the look of the ENDORFY Thock TKL HU Red to complete the battle station of your dreams. Highlight each of the 87 keys in a different color, differentiate the core keys with a separate hue or set a single effect across the board. You can do this with the help of the included software or directly from the keyboard.

Perhaps some will say it's unnecessary and a gizmo (you can always disable it entirely)... but if you like to play with the look of your setup every now and then, the ARGB backlighting is the thing for you.

Adjustable angles

To make clicking even more comfortable, we equipped the ENDORFY Thock TKL HU Red with [adjustable](#) feet. With them, you can place the keyboard at an angle that best suits your needs.

And if you want additional support, you can equip it with a matching Thock TKL Palm Rest (available separately) – a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC. Some people use it as a stand for a coffee mug – but we haven't tested that. Yet.

Cable management made easier

The ENDORFY Thock TKL HU Red keyboard chassis allows you to route the cable in three different ways, helping you make better use of your desk space.

It's possible thanks to a [detachable](#) cable and three custom-made channels on the bottom of the keyboard, allowing you to arrange the cable conveniently – for example, closer to the grommets or at the edge of the table.

~~Everything~~ [Keyboard](#) under control

Do you like to have ~~everything~~ [keyboard](#) under control? We thought of that – and equipped the ENDORFY Thock TKL HU Red with functional and feature-packed software.

We fondly refer to it as "God mode". With its help, you'll adjust all keyboard settings to your needs – whether it's changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock TKL HU Red – main features:

- TKL mechanical keyboard
- Modern design
- Configurable RGB backlighting
- High durability
- Kailh Red mechanical switches
- Detachable cable
- Adjustable feet
- N-Key Rollover function
- Functional software

ENDORFY Thock TKL HU Red – technical specifications:

- Product code: EY5E004
- EAN: 5903018665467
- Product type: Keyboard
- Type of keyboard: mechanical
- Color: black
- Layout: HU
- Dimensions (L×W×H): 361.5×140×42.5 mm
- Number of keys: 87
- Switch type: Kailh Red
- Switch color: red
- Hot-swap: no
- Keycap material: ABS
- Keycap manufacturing technology: laser printed
- Keycap color: black
- Backlight type: RGB
- Connectivity:
 - Gold-plated USB, cable length: 1.8 m
