

Product name: ENDORFY Thock IT Red
Product code: EY5G010

The ENDORFY Thock IT Red on your desk is like personal support in daily challenges [quests](#). We're dead serious – the keyboard feels great and comfortable under your fingers, and thanks to the reinforced top, it can survive even the fiercest battles. It also has ARGB backlighting, so you can have your own Northern Lights over the desk.

It's cool on the inside, too. Under the buttons, we've hidden the ultra-durable Kailh Red switches – these bad boys specialize in fast responses and quiet clicks. We armed them with keycaps with an Italian layout, you can use them without worrying about slipping off the buttons. We just know that, in the clutch, you have more important things ~~on your mind~~ [under your fingers](#).

Everything at hand

With the ENDORFY Thock IT Red you have everything at your fingertips. Literally, because the keyboard has a [comfortable](#) size with a numpad on the side. Some people say it's unnecessary – but the truth is that those few extra keys can be invaluable for macros and calculations.

Simply speaking, the Thock Blue is a full-sized mechanical keyboard with an aluminum top. We designed it to withstand any storm. As a result, it's scratch-resistant and stays firmly attached to the desk, even during the most intense "work".

You have the [power](#)

We ~~play~~ [click](#) a lot, and we don't like to walk on eggshells with our equipment. That's why we've made sure that the ENDORFY Thock IT Red can take it all – the keyboard sports ultra-durable, red-hot Kailh Red switches.

Kailh Red are what we call "linear" switches – smooth all the way down, they excel where an immediate reaction is a must. Just a light flick of the key and you disappear from your enemy's sights. They're also durable, with an estimated lifespan of as many as [50 m](#) clicks (and thanks to the N-Key Rollover, each and every click is recorded and executed, period).

Keycaps made of ABS

The ENDORFY Thock IT Red is a mechanical keyboard that lets you ~~tell~~ [write](#) your story – defeat virtual enemies, win races, chat with your friends... Anything you want.

All thanks to durable ABS keycaps. They won't crack (literally!) even in the most intense battles, are very pleasant to the touch and hold your fingers well. Plus, they look beautiful with ARGB backlighting, so you can expect a few jealous looks from your team.

Strong (and comfortable) beast

The ENDORFY Thock IT Red keyboard is a beast – both strong and comfortable to use. It has great parameters and a black as night chassis that could easily be

used as a weapon in a zombie apocalypse. Virtual monsters are no big deal.

Its construction with an aluminum top is resistant to damage and very rigid. In addition, it sticks to the desk steadily and doesn't move even during long work hours. Looks mighty fine too – the patterns on the bottom and the ARGB backlighting give it a feisty flair.

For your convenience, the ENDORFY Thock IT Red is equipped with [adjustable](#) feet. Pick the height that best suits your needs. And if you want additional support, you can pair it with a matching Thock Palm Rest (available separately) – a magnetic add-on that'll keep your wrist comfortable, allowing you more time at the PC. Some people use it as a stand for a coffee mug – but we haven't tested that. Yet.

The Ring wheel of power

With the ENDORFY Thock IT Red keyboard on your desk, you're in complete control (of the sound, at least). You can quickly mute those annoying teammates or turn up the volume on your favorite track with a single move. We are still working on the button to take over the world, though.

That's possible thanks to the wide metal volume wheel we added to the chassis. It has an accentuated and perceptible step, so you can fine-tune the sound without taking your eyes off the monitor. Adjust the volume by turning it or mute everything with a click.

Can you [light up](#) in here?

Keyboards without backlighting look cool, but if you like to stand out from the crowd, ARGB is the perfect choice. With just one click, your desk looks like the inside of a spaceship (or a unicorn house – we respect that, too).

With the ENDORFY Thock IT Red, you can easily customize the look of the keyboard to match the rest of your battle station. Highlight each of the keys separately, change the color of the core hotkeys or set a single effect across the board. You can use the included software or do it directly from the keyboard.

Several ways to arrange a cord

The ENDORFY Thock IT Red chassis allows you to route the cable in one of three directions. Thanks to this, you finally can make better use of space on your desk.

This is thanks to the detachable cable and three channels on the bottom of the keyboard. Each of them allows you to arrange the cable in a comfortable position – for example, closer to the grommets or at the edge of the tabletop.

Activate the God mode

Like to have [absolute](#) freedom and full control? We do too – so we added functional and feature-packed software to the ENDORFY Thock IT Red. Do it your way.

We fondly refer to it as “God mode”. With its help, you’ll adjust all keyboard settings to your needs – whether it’s changing the ARGB backlight and its color, customizing the effects, or creating new profiles. If you want, you can even create your own macros.

ENDORFY Thock IT Red – main features:

- Programmable ARGB lighting
- Detachable cable
- Volume control knob with mute button

ENDORFY Thock IT Red – technical specifications:

- Product code: EY5G010
- EAN: 5903018667195
- Product type: keyboard
- Type of keyboard: mechanical
- Color: black
- Layout: IT
- Dimensions (L×W×H): 445.4×140×42.5 mm
- Number of keys: 104
- Switch type: Kailh Red
- Switch color: red
- Hot-swap: no
