

**Product name: ENDORFY LIV Plus Wireless**  
**Product code: EY6A016**

The ultra-lightweight and ultraprecise LIV Plus Wireless mouse is our gesture towards gamers and esports players. Every component, from the light construction with a PixArt PAW3395 sensor to the included charging dock, has been created to increase your endurance and efficiency during long gaming sessions. Connect to your PC, console, phone or TV and just win it all – effortlessly.

- No limits – the included charging dock comes with a USB receiver port, enabling wireless charging. The station has a reusable rubber pad on its bottom to keep it from slipping.
- Move quickly and with confidence – ultra-lightweight and perfectly balanced body of LIV Plus Wireless is ENDORFY's in-house design. It guarantees you quick, unimpeded and precise moves.
- Long-distance efficiency – thanks to a 500 mAh battery and optimized firmware you can enjoy using LIV Plus Wireless for up to 160 hrs on one charge.
- Top-notch sensor – the PixArt PAW3395 sensor with maximum definition of 26 000 DPI and tracking speed of 16.51 m/s enables you to make split-second decisions. Tune all the parameters to your favorite game and go for the win.
- Versatile connection modes – thanks to the *trimode* function, the LIV Plus Wireless mouse is compatible with most devices used for gaming. Experience lag-free connection with your PC, console, telephone or TV.
- Dedicated software – adjust all the parameters of LIV Plus Wireless to your preference: create macros, change the mouse sensitivity & LOD or choose a backlight type of various elements.

**No limits**

Included with LIV Plus Wireless you'll find a charging dock that allows for comfortable, wireless charging of the mouse. Thanks to anti-slip rubbers (that are easy to clean and reattach) it stays firmly in one place.

**Move quickly and swiftly**

The ultra-light and perfectly balanced body of LIV Plus Wireless is our in-house design. Its breathable surface provides not only great airflow beneath your hand but also a staggering advantage over your foes in games and esports competitions. To put it simply – your moves will be fast, unimpeded and fully controlled.

**Long-lasting performance**

An efficient battery and optimized firmware are the heart of LIV Plus Wireless. They let us increase the working time of the mouse to 160 hours on one charge, even with consistent usage.

**Top-notch sensor**

PAW3395 is a top-of-the-game sensor from PixArt. Its max DPI of 26,000 and tracking speed of 16.51 m/s let you make split-second decisions. Just tweak all the settings to go along with your favorite games and go boldly for the win!

### **Three connection modes via trimode**

LIV Plus Wireless is compatible with almost all devices used for gaming and provides you with a stable, lag-free connection with PCs, consoles, telephones or TVs. Plug it in via a USB cable, connect using Bluetooth or through 2.4 GHz wireless and check which option works best on your battlefield.

### **Just as you like it**

Thanks to dedicated software you can adjust LIV Plus Wireless to your preference. It allows you to create macros and change the sensitivity, LOD or the backlight of various elements.
